Xetra Release 9.1
Member Front End Development Guide, Programming Version
XML-Reports Description, Programming Version

Dear Sir or Madam,

We published today the following documents with regard to the planned introduction of Xetra Release 9.1 on November 24, 2008:

- Member Front End Development Guide, Programming Version
- XML-Reports Description, Programming Version

The *"Member Front End Development Guide, Programming Version*" is the updated version of the VALUES API description and contains detailed information about application requests, subscriptions and responses which will be offered with Xetra Release 9.1. The final version of the interface specification will be made available at a later date. The programming version reflects the current planning status.

The *"XML-Reports Description, Programming Version"* offers an overview of the reports that are available in XML format and additional text reports generated from these. The final version of the XML-Reports Description will be published at a later date. Instead of one field for display of the total transaction fees, the final version will contain two fields for separate display of the fixed and variable components of transaction fees in fee reports CB142, CB150 and CB160. The programming version reflects the current planning status.
