Xetra Release 9.0 Permanent Simulation Frankfurt 2: Information regarding Distribution and Installation of Mandatory Simulation Update Kit 5

Dear Sir or Madam,

This circular provides details about distribution and installation of the mandatory Xetra Release 9.0 Permanent Simulation update kit 5 for Xetra Frankfurt 2.

In connection with the re-opening of Xetra Frankfurt Advanced Simulation, the Xetra 9.0 Permanent Simulation Frankfurt 2 will be provided in the new simulation environment 62. Access to the Permanent Simulation Xetra Frankfurt 2 will only be possible via the new xnet62 account which has to be set up, and using the new software. Participants will receive the corresponding passwords by e-mail in due time.

The Xetra 9.0 Permanent Simulation Frankfurt 2 will be available again as of **July 7, 2008.**

If you are not connected to Xetra Release 9.0 Frankfurt 2 production, a connection test may be required for participation in the new Xetra 9.0 Permanent Simulation Frankfurt 2. In this case, please call your technical account manager at +49-(0) 69-2 11-1 84 00.

Please note that installation of the simulation update kit is mandatory. Connection to the Xetra back-end for Xetra 9.0 Permanent Simulation Frankfurt 2 will only be possible by using the new software.

Information regarding Distribution and Installation of Front-End Simulation Software

Distribution:
On Friday, **June 27, 2008**, after close of trading, you will receive the new front-end simulation software for the Permanent Simulation Xetra Frankfurt 2 environment. Transmission will take place via FTP to your report nodes.

The target transfer directory on the Xetra simulation MISS is:

SUN Solaris 10:	**/opt/gate/transferdir/release52**
Windows Server 2003:	**<ftp-root directory>\release52**

Each member firm will receive both mandatory simulation update kits, i.e. the kit for SUN Solaris 10 and the kit for Microsoft Windows.

To ensure a smooth kit distribution, please note the following:

- At least **45 MB** free disk space has to be available in the transfer directory on each of your simulation MISSes.
- Make sure that your report MISSes of the Xetra simulation environment will be reachable without interruption from Friday evening, **June 27, 2008** until Tuesday morning, **July 1, 2008** to enable the file transfer.
- Check that the necessary read and write permissions for files and folders are set correctly.

Deutsche Börse AG will monitor the successful distribution of the kits. In case of any transfer problems, another transfer for the next day will be initiated automatically. In addition, the software will be available on the website of Deutsche Börse Group for download as of **June 27, 2008** under the following path:

www.deutsche-boerse.com > Trading & Clearing > Members Only > Xetra/Floor > Xetra Information > Xetra Software > Xetra 9.0

Installation:
In order to participate again in the Xetra 9.0 Permanent Simulation Frankfurt 2, it is necessary that members install the mandatory simulation update kit by July 7, 2008. Installation after this date is possible but will delay participation in simulation.

The xnet62 account must be set up before installing the software. Please note that the account has to be added manually under Microsoft Word.

In order to set up Xetra Frankfurt 2, members additionally have to select program “XETRAprepareExchange.pl“ after installation and, where necessary,

Management Board
Frank Gerstenschläger
(Chairman)
Rainer Riess
(Deputy Chairman)
Roger Müller
Jürgen Röthig

finalize the software installation by using the “Configuration Utility Tool”. More details can be found in the “Xetra 9.0 Front End Installation Guide”, chapters 4.2 and 4.3.

On July 2, 2008, an updated version of aforementioned document will be provided on our website for download under the following path:

www.deutsche-boerse.com > Trading & Clearing > Xetra > Xetra/Floor Members Only > Xetra Information > Xetra Documentation > Xetra 9.0 > Technical

Also, the “Installation Notes” (readme file) for the update kits, which will be distributed together with the software kits, contains further information.

Distribution of @Xetra Software via Java Web Start

For @Xetra customers, all front-end software components will be distributed through the Web Start servers managed by Deutsche Börse Systems AG. By starting the applications available under

http://atxetra.deutsche-boerse.com/xetra/simu/

the download process will be initiated. The Xetra Release 9.0 software for Permanent Simulation Xetra Frankfurt 2 will be available for automatic download as of **June 30, 2008**. After the download has been completed, @Xetra customers will be able to log in to the Xetra back-end.

Important: It is compulsory that @Xetra members have installed **Java jre1.6.0_03** on the @Xetra client. Also, they must clear the Java cache and the browser cache **before** starting @Xetra.

For any further questions you may have, please call Xetra Customer Technical Support at tel. +49-(0) 69-2 11-1 84 00 or the Scoach Helpline at tel. +49-(0) 69-2 11-1 93 33.

Yours faithfully,
On behalf of the Management Board

Axel Birk
