Xetra Release 9.0 Production:
Information about Distribution and Installation of optional Production Update Kit 1

Dear Sir or Madam,

This circular provides details about distribution and installation of an optional Xetra Release 9.0 production update kit 1 for Xetra front-ends Xetra Frankfurt and Xetra Frankfurt 2.

Please be aware that selection of unnetted broadcasts of the Public Inside Market Stream is not supported in Xetra Frankfurt 2. We strongly urge you not to select this stream. Please check your configuration as to that effect.

By means of the new software, behavior of the VALUES API "Xetra Inquire Instrument List" request is improved. Currently, not the complete data is displayed if a blank is entered in the "instAssCod" field.

We recommend that all members who use the VALUES API "Xetra Inquire Instrument List" request install production update kit 1.

However, production update kit 1 must not be installed before installation of initial Xetra Release 9.0 production software has been successfully completed.

After installation of the update kit, the request can be tested in the course of the connection test on Saturday, April 26, 2008 in the production environment of Xetra Release 9.0.

Information about Distribution and Installation of optional Xetra Release 9.0 Production Update Kit 1

Distribution:
On Thursday, **April 24, 2008**, after close of trading, you will receive the Xetra Release 9.0 production update kit 1 for production environments Xetra Frankfurt and Xetra Frankfurt 2. Transmission will take place via FTP to your report nodes.

For trading members using @Xetra, the update will be delivered as part of the Xetra Release 9.0 production software on Saturday, **April 26, 2008** via the Java Web Start technology.

The target transfer directories on the Xetra Release 9.0 production MISSes are:

SUN Solaris 10:	**/opt/gate/transferdir/release51**
Windows Server 2003:	**<ftp-root directory>\release51**

Each member will receive both Xetra Release 9.0 production update kits 1, i.e. the kit for SUN Solaris 10 and the kit for Microsoft Windows. No separate software update kits 1 for Xetra Frankfurt 2 will be distributed.

To ensure a smooth update kit distribution, please note the following:

- At least **1 MB** free disk space has to be available in the transfer directory on each of your production MISSes.
- Make sure that the report MISSes of your Xetra production environments will be reachable without interruption from Thursday evening, **April 24, 2008** until Friday morning, **April 25, 2008** to enable the file transfer.
- Check that the necessary read and write permissions for files and folders are set correctly.

Deutsche Börse AG will monitor the successful distribution of the kits. In addition, the software will be available on the website of Deutsche Börse Group for downloading as of **April 24, 2008** under the following path:

www.deutsche-boerse.com > Trading & Clearing > Members Only > Xetra/Floor > Xetra Information > Xetra Software > Xetra 9.0

Installation:
Prior to installation of the Xetra Release 9.0 production update kit 1, installation of the initial Xetra Release 9.0 production software must be completed. Please make sure to follow the installation instructions we published with Xetra circular 070/08.

It is sufficient to install the Xetra Release 9.0 production update kit 1 on the MISS servers only.

For any further questions you may have, the Xetra Release 9.0 Support team is available on telephone +49-(0) 69-2 11-1 93 33, Xetra Customer Technical Support can be reached on telephone +49-(0) 69-2 11-1 84 00.

Yours faithfully,
On behalf of the Management Board

Axel Birk
