Eurex, in conjunction with the Futures Industry Association (FIA) Information Technology Division, will participate in an industry-wide disaster recovery test on Saturday, **October 14, 2006.** The test involves global futures exchanges, U.S. clearinghouses, FCMs, back office service providers, market data vendors, and clearing banks.

Eurex would like to invite all member firms to participate in this test to allow as comprehensive an exercise as possible. During this test members will be able to connect their MISS servers to the Eurex production back end. Order entry will not be supported.

Besides, FIA offers workshops in Chicago and New York on September 12 and 20, 2006 respectively, to discuss the test and solicit feedback from participants.

Registration for the test and the workshops has been centralized for all participants; to register please visit the FIA's Disaster Recovery/Business Continuity website:

http://www.futuresindustry.org/business-2678.asp

The login username is "fiadr" and the password is "mab".

If a firm is a member of more than one futures exchange or U.S. clearinghouse, it may receive a similar notification from other exchanges or clearing organizations. However, registration for the test and the workshops has been centralized for all participants at the FIA website cited above.
