Futures contracts on dividends of stocks	

The company Rational AG has announced the payment of a special dividend of EUR 2.50 per share in addition to a regular dividend of EUR 7.50 per share.

More information about this special dividend payment is available on the company's website under [www.rational-online.com](http://www.rational-online.com).

The payment of the special dividend will result in an adjustment of the above-mentioned contracts.

## Procedure

### R-Factor Method

Determination of adjustment factor (R-factor)

S1	Closing auction price of the share
S2	S1 minus ordinary dividend
S3	S2 minus special dividend
R-Factor	$S3/S2$

## Options

### 1. Adjustment of strike prices and contract sizes

- All existing strike prices will be multiplied by the R-factor.
- The contracts size will be divided by the R-factor.
- The version number of the existing series will be increased by one.  
Immediately after close of trading on the last cum-trading day, adjusted strike prices and contract sizes will be published on [www.eurex.com](http://www.eurex.com) in section **Rules & Regs > Corporate actions > Corporate action information**
- New series with standard contract size 100 and version number 0 will be introduced effective the ex-date.
- All existing orders and quotes will be deleted after close of trading on the last cum-trading day.
- The adjustment also refers to existing positions in TES flexible options.

### 2. Exercises

- Upon exercise of an adjusted series cash settlement will be made for the fractional part of the new contract size.

## Futures

### 1. Adjustment of contract size and variation margin

- The adjustment is done via the same R-factor as for the Options
- To adjust the calculation of the variation margin of the following exchange trading day, settlement prices of the last cum-trading day will be multiplied by the R-Factor.
- The new contract size will be calculated as follows:  
 $\text{Contract size new} = \text{contract size old} / \text{R-factor}$
- All outstanding orders and quotes will be deleted after close of trading on the last cum-trading day.
- The adjustment also refers to existing positions in TES flexible futures.

### 2. Introduction of a new contract

- A new single stock futures contract with standard contract size 100 will be introduced.
- The exact introduction date will be published via a circular.
- As soon as the new contract is available for trading and there is no more open interest in the original contracts, trading in these contracts will be discontinued.
- Furthermore, no new contract months will be introduced in the original futures contracts.

**Should there be no open interest in the original contracts on the last cum-trading day after close of trading, these contracts will not be adjusted, and no successor contracts will be introduced.**
