Change of Bandwidth for Connections to the Xetra Network

The Executive Board of Deutsche Börse AG has decided on an upgrade of bandwidth for member connections to the Xetra system from currently 128 kbps to 512 kbps. Please find more details in the attached corresponding Xetra circular 114/06.

Since Eurex Bonds members sharing their Xetra leased line with the Eurex Bonds market will profit from the network enhancement, the Management Board of Eurex Bonds has decided to offer the bandwidth upgrade also for those members using dedicated lines for Eurex Bonds.

The bandwidth upgrade for dedicated Eurex Bonds lines will be offered on a voluntary basis. Nevertheless, the upgrade is highly recommended in order to cope with higher data transmission rates. It will also satisfy members' requirements to use an innovative, reliable and cost-effective technology. Eurex Bonds currently plans to keep the connection fees unchanged at the level of today's 128 kbps connections.

Implementation Procedure and Schedule

Eurex Bonds will address all members using dedicated Eurex Bonds leased lines in an individual email, giving details about the course of the migration and the activities necessary on the member's side. In order to guarantee a smooth and quick process of the bandwidth upgrade, we kindly ask these members for participation in the migration activities and timely implementation of all migration steps.
