Ü Front Office/Handel Ü Middle + Backoffice Ü Revision/Security Coordination	1. New Auction Schedule for 2010 2. Auction Buckets with Instrument Assignment 2010 Beide Anhänge nur in englischer Sprache

Seit Juli 2009 werden ausgewählte Instrumente im Handelsmodell „Auktionen“ für Covered Bonds & Guaranteed Bonds gehandelt.

Durch den Verfall der Instrumente mit Fälligkeit 2009 ist es notwendig, ab **4. Januar 2010** die Zuordnung der Instrumente zu den Auktionen für Covered Bonds & Guaranteed Bonds anzupassen.

Um eine Begrenzung der Instrumente pro Auktion zu gewährleisten, wird ab 4. Januar 2010 das Bucket für Instrumente mit Fälligkeit 2013 in zwei Auktionen unterteilt. Die Buckets für Instrumente mit Fälligkeit 2014 und 2015 werden in vier Auktionen gegliedert.

Bitte beachten Sie, dass in diesem Zusammenhang auch der Auktionsbeginn für einzelne Buckets angepasst wurde.

Weitere Details entnehmen Sie bitte den Anhängen.

Principles of Auction Trading

- Auctions will run for a pre-defined amount of time.
- Orders / quotes can be entered into the system during the auction phase, but no trading takes place until the auction ends and the price is determined.
- During the auction, if the order book is crossed, an indicative price is shown with volumes and bid- or ask-surplus. If there is no order book crossing, best bid / best ask with volumes will be displayed.
- At the end of an auction matching takes place if possible and the auction price is set; if matching is not possible, auction ends without price fixing.
- Match principle: Maximization of turnover with a minimum of surplus.
- After the auction, remaining quotes will be automatically transferred into the open order book for the following continuous trading phase.

Instrument Static Data

- For a differentiation of instruments selected for intraday auctions, following specification within WM-Datenservice for Eurex Bonds is used:

  WM Table F60, Trading Type **à** Field XD522WA

  - For Instruments with intraday auction -> '**20**'
  - For instruments without intraday auction -> '**30**'

- The setup data of the instruments in the Xetra trading system, including auction schedule, are provided by Deutsche Börse via a CSV-file.
- The file is updated daily and contains all Xetra listed instrument. A filter of "MIC Code"="XEUB" selects all listed instruments at Eurex Bonds.
