Deutsche Börse AG (DBAG), Clearstream Banking AG (Clearstream), Eurex Frankfurt AG, Eurex Clearing AG (Eurex Clearing) as well as Eurex Bonds GmbH (Eurex Bonds) and Eurex Repo GmbH (Eurex Repo) are corporate entities and are registered under German law. Eurex Zürich AG is a corporate entity and is registered under Swiss law. Clearstream Banking S.A. is a corporate entity and is registered under Luxembourg law. Deutsche Boerse Asia Holding Pte. Ltd., Eurex Clearing Asia Pte. Ltd. and Eurex Exchange Asia Pte. Ltd are corporate entities and are registered under Singapore law. Eurex Frankfurt AG (Eurex) is the administrating and operating institution of Eurex Deutschland. Eurex Deutschland and Eurex Zürich AG are in the following referred to as the "Eurex Exchanges".

All intellectual property, proprietary and other rights and interests in this publication and the subject matter hereof (other than certain trademarks and service marks listed below) are owned by DBAG and its affiliates and subsidiaries including, without limitation, all patent, registered design, copyright, trademark and service mark rights. While reasonable care has been taken in the preparation of this publication to provide details that are accurate and not misleading at the time of publication DBAG, Clearstream, Eurex, Eurex Clearing, Eurex Bonds, Eurex Repo as well as the Eurex Exchanges and their respective servants and agents (a) do not make any representations or warranties regarding the information contained herein, whether express or implied, including without limitation any implied warranty of merchantability or fitness for a particular purpose or any warranty with respect to the accuracy, correctness, quality, completeness or timeliness of such information, and (b) shall not be responsible or liable for any third party's use of any information contained herein under any circumstances, including, without limitation, in connection with actual trading or otherwise or for any errors or omissions contained in this publication.

This publication is published for information purposes only and shall not constitute investment advice respectively does not constitute an offer, solicitation or recommendation to acquire or dispose of any investment or to engage in any other transaction. This publication is not intended for solicitation purposes but only for use as general information. All descriptions, examples and calculations contained in this publication are for illustrative purposes only.

Eurex and Eurex Clearing offer services directly to members of the Eurex exchanges respectively to clearing members of Eurex Clearing. Those who desire to trade any products available on the Eurex market or who desire to offer and sell any such products to others or who desire to possess a clearing license of Eurex Clearing in order to participate in the clearing process provided by Eurex Clearing, should consider legal and regulatory requirements of those jurisdictions relevant to them, as well as the risks associated with such products, before doing so.

Eurex derivatives are currently not available for offer, sale or trading in the United States or by United States persons (other than EURO STOXX 50® Index Futures, EURO STOXX 50® Index Quanto Futures, EURO STOXX 50® ex Financials Index Futures, EURO STOXX® Select Dividend 30 Index Futures, EURO STOXX® Index Futures, EURO STOXX® Large/Mid/Small Index Futures, STOXX® Europe 50 Index Futures, STOXX® Europe 600 Index Futures, STOXX® Europe 600 Banks/Industrial Goods & Services/Insurance/Media/Travel & Leisure/Utilities Futures, STOXX® Europe Large/Mid/Small 200 Index Futures, DAX®/MDAX®/TecDAX® Futures, SMIM® Futures, SLI Swiss Leader Index® Futures, MSCI World/Europe/ Europe Value/Europe Growth/Emerging Markets/Emerging Markets Latin America/Emerging Markets EMEA/Emerging Markets Asia/Frontier Markets/China Free/India/Japan/Malaysia/South Africa/Thailand/AC Asia Pacific ex Japan Index Futures, TA-25 Index Futures, Daily Futures on TAIEX Futures, VSTOXX® Futures, EURO STOXX 50® Variance Futures, Gold and Silver Futures as well as Eurex property and interest rate derivatives).

Trademarks and Service Marks

1. Introduction

Eurex Exchange's T7 operates the on-exchange trading as well as the TES (Trade Entry Service) functionality of the Eurex derivatives exchange. The Eurex Clearing system continues to provide clearing functions, operating the same as today.

Using the Eurex Admin GUI, service administrators in participant offices are able to add and maintain on-exchange trading users and TES users, including:

- Restricting access to products.
- Restricting functions.
- Restricting order and quote quantities.
- Restricting which orders can be acted upon (scope of orders).
- Restricting which TES Types can be used

For example, user functions and access to products can be restricted in T7 using the entitlement concept. Service administrators entitle users to specific roles for specific product assignment groups (e.g. a user may be entitled to a market maker role for the German Interest Rate Futures & Options).

1.1 Purpose of this Manual

This manual is intended to assist service administrators who are responsible for maintaining participant and user related data in Eurex Exchange's T7.

The following areas are covered:

- Explanation of fundamental concepts.
- Pre-defined user roles (e.g. market maker).
- Maintenance processes by service administrators.
- TES Type Eligibility

1.2 Maintenance Summary

Some data is maintained in the Eurex Clearing system and is automatically synchronized with Eurex Exchange's T7.

The following is a summary of the data maintained in the Eurex Clearing system and the data maintained in T7 (see chapter 5):

Data	Eurex Clearing System	Eurex Exchange's T7
Trading and clearing members	✔	
Participant / business unit		✔
Maximum order quantities (per member)	✔	
Eurex TES users		✔
On-exchange T7 trading users		✔
T7 user groups		✔
T7 user roles		✔
T7 entitlements		✔
T7 transaction size limits (per user)		✔
T7 user passwords		✔
T7 TES Type Eligibility		✔

Please refer to the document "Technical Connection Requests and Configuration – User Manual" for information on how to order and administer sessions (e.g. session id, password) for applications that access T7 via the electronic interfaces (Eurex ETI and Eurex FIX Gateway). The document is available in the member section of the Eurex website:

http://member.eurexchange.com > Help > Technical Connection > Manual Requests & Configuration

1.3 Further Reading

The following documents provide additional information to complement this manual:

- Eurex Functional and Interface Overview
- Eurex Trader and Admin GUI – User Manual
- Eurex Functional Reference
- Eurex Enhanced Trading Interface – Manual
- Eurex FIX Gateway – FIX 4.2 and FIX 4.4 Manual

These documents are available on the Eurex website www.eurexchange.com > Technology > Eurex Exchange's T7 > System Documentation.

1.4 What's new

With the launch of release 4.0 of Eurex Exchange's T7 for **21 November 2016** the TES functionality will be migrated from the Eurex Clearing classic system to Eurex Exchange's T7 trading platform which is already available for on-exchange trading.

The TES functionality entitlement follows the same basic logic as on-exchange trading. Pre-defined roles will be assigned to Product Groups, enabling users to participate in TES functionality. The maintenance of Transaction Size Limits for users will be moved to T7 as well.

In addition to this, the TES Type Eligibility restricts which TES Types a business unit or a user can use. The following TES Types are available:

- Block trading (includes Flex contracts and "Trade at Market" (TAM))
- Vola Trade
- EFP-Fin
- EFP-IND
- EFS

For further information to TES Type Eligibility, please refer to chapter 4.

All TES Type Eligibilities will be automatically migrated on business unit level.

The Service Administrator can maintain the TES Type Eligibility on user level in the GUI "User Maintenance" screen.

1.5 Entitlement migration

1.5.1 Migration of user entitlement

In order to support participants, Eurex will automatically migrate certain user entitlements to the T7 trading platform.

Prerequisites for this are:

- The user ID used for TES trading in the Eurex Clearing classic system exists on the Eurex Exchange's T7 trading platform (e.g. user ID ABCFRTRD001 exists on both platforms).
- The user is actively participating in TES trading in the period before the migration.

If both prerequisites are fulfilled, Eurex will automatically migrate the following attributes based on the settings in the Eurex Clearing classic system:

- User TES Type Eligibility
- User Entitlement (assigning TES Trader and TES Broker role for assigned Product Groups)
- User Transaction Size Limits (UTSL) per Product
- User Default Transaction Size Limits per Product Group

The migration of the above mentioned attributes on user level will be based on the respective settings in Eurex Clearing classic system on 09. November 2016 (end-of-day). Modifications done after this date will not be taken into account and have to performed again in T7 after the introduction of release 4.0.

1.5.2 Migration of participant entitlement

The TES Type Eligibility on participant level will be migrated based on the respective settings in Eurex Clearing classic system on 09. November 2016 (end-of-day). Modifications done after this date will not be taken into account and have to performed again after the introduction of release 4.0.

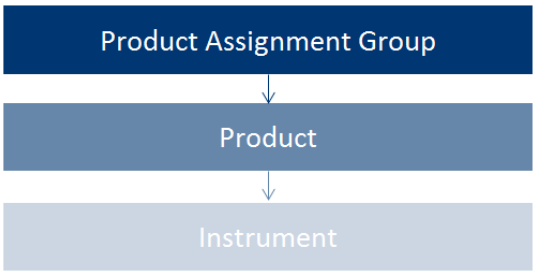

TES Transaction Size Limits on participant level (set by GCM) will initially be migrated based on the respective settings in Eurex Clearing classic system on 09. November 2016 (end-of-day). Modifications done after this date will not be taken into account before 22. November 2016.

2. Concepts

This chapter describes the fundamental concepts in Eurex Exchange´s T7 regarding products, participants, users, entitlements and transaction size limits.

2.1 Product Assignment Groups

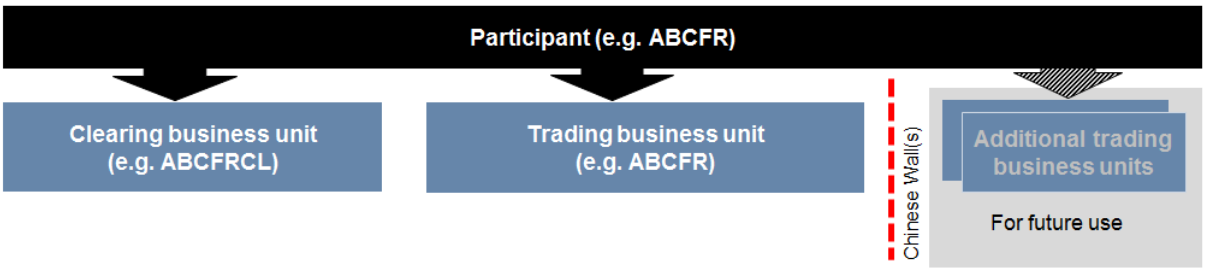

Each market in T7 includes a hierarchy of product assignment groups, containing products and instruments (options series / futures contracts). Product assignment groups are the same as the Eurex Clearing system, and the product hierarchy is maintained by Eurex Exchange.

For example, the product assignment group “German Interest Rate Futures & Options“ contains the products FGBL, FGBM, FGBS, FGBX, OGBL, OGBM, and OGBS. A simple instrument would be FGBL DEC 2015.

2.2 Participant Structure

A participant is an entity in T7 equivalent to a member in the Eurex Clearing system. There is one participant for every trading and clearing member, according to the following structure:

Participant data is set up and maintained by Eurex Exchange, and a participant is authorized to a market (e.g. Eurex). The Eurex concept of a member remains in place, and is represented by a “participant”’ in T7. When trades are sent to the Eurex Clearing system, the participant is represented by its corresponding member-ID.

Currently in T7, a participant has up to two pre-defined business units. Trading members have one business unit designated for trading, under which all trading users are assigned.

Clearing members have one business unit designated for clearing. Clearing business units do not have users; instead they receive trade broadcasts for back-office purposes. Clearing business units

can receive all on-exchange trades from every trading member for whom they are the designated clearing member.

Clearing members that also trade will have both a trading and a clearing business unit.

Every business unit has a business unit short name (e.g. clearing business unit “ABCFRCL”), as well as a unique numeric business unit ID.

2.3 Users

A user is a person, such as a trader or a service administrator that interacts with Eurex Exchange’s T7. A user may also be a machine, for example an order routing or quoting system.

Every user of T7 belongs to exactly one trading business unit.

Service administrators define a user short name that is equivalent to the Trader ID in the current Eurex system (e.g. TRD001).

A unique numeric user ID is automatically generated for each user and is used by T7´s electronic interfaces.

A user login name is also generated, combining the participant ID (e.g. “ABCFR”) with the user short name, for use in the new Eurex Trader and Eurex Admin GUIs.

Service Administrators can assign PINs to users. Users can view their own PIN in the login window of the Trader GUI and Admin GUI.

2.4 User Roles

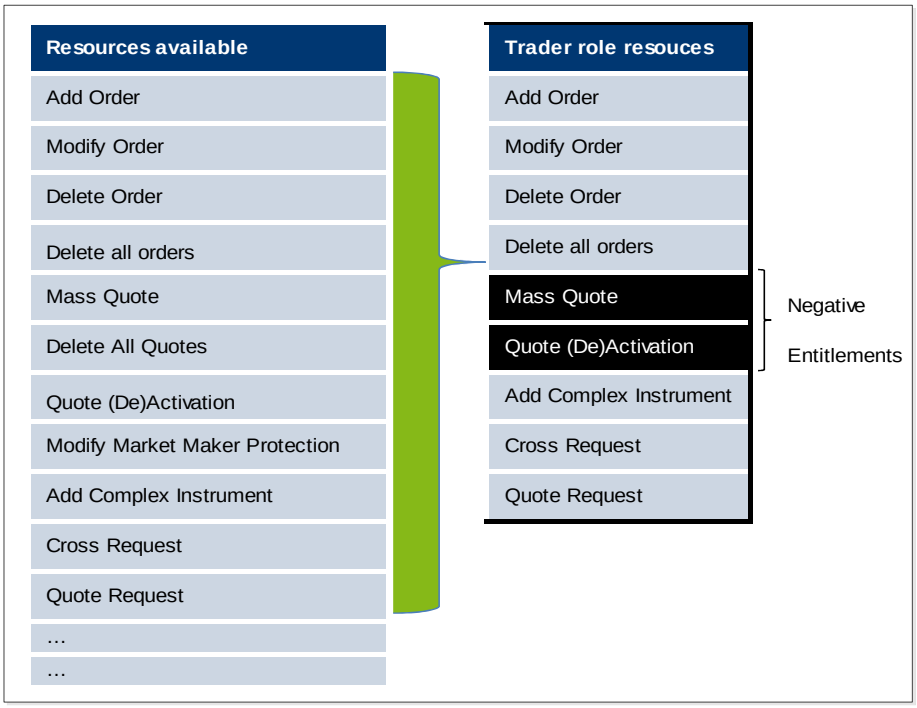

Participants can restrict the functions that users are allowed to perform, and for which products they are entitled. Eurex Exchange’s T7 includes a set of pre-defined user roles, configured and maintained by Eurex Exchange. User roles offer participants a simplified approach to administration:

- Sets of resources (e.g. mass quote) are combined to define a logical user role (e.g. market maker).
- A participant assigns roles to users, and multiple roles can be assigned to the same user (multiple user IDs are not needed).
- A user is granted entitlements for specific roles for specific product assignment groups (see 2.5)
- Resources that are not allowed for a specific user role (e.g. mass quote by trader role) are restricted using a negative entitlement concept, explained below.

Refer to section 3 for the complete set of pre-defined user roles available to participants.

The negative entitlement concept prevents a user from being granted certain resources in the case when they have been assigned to more than one user role in the same product assignment group. For example, as shown in the following diagram, negative entitlement is configured for mass quote and quote activation for the trader role – this means, that even if the user is assigned another role where mass quote is allowed (e.g. market maker), the negative entitlement will block that function, and mass quoting will still be prevented. Negative entitlement does not apply when a user is assigned to a different role in a different product assignment group.

The following diagram is an example of the user role concept, showing that a subset of all available resources (on the left) is selected to form a role (trader role on the right):

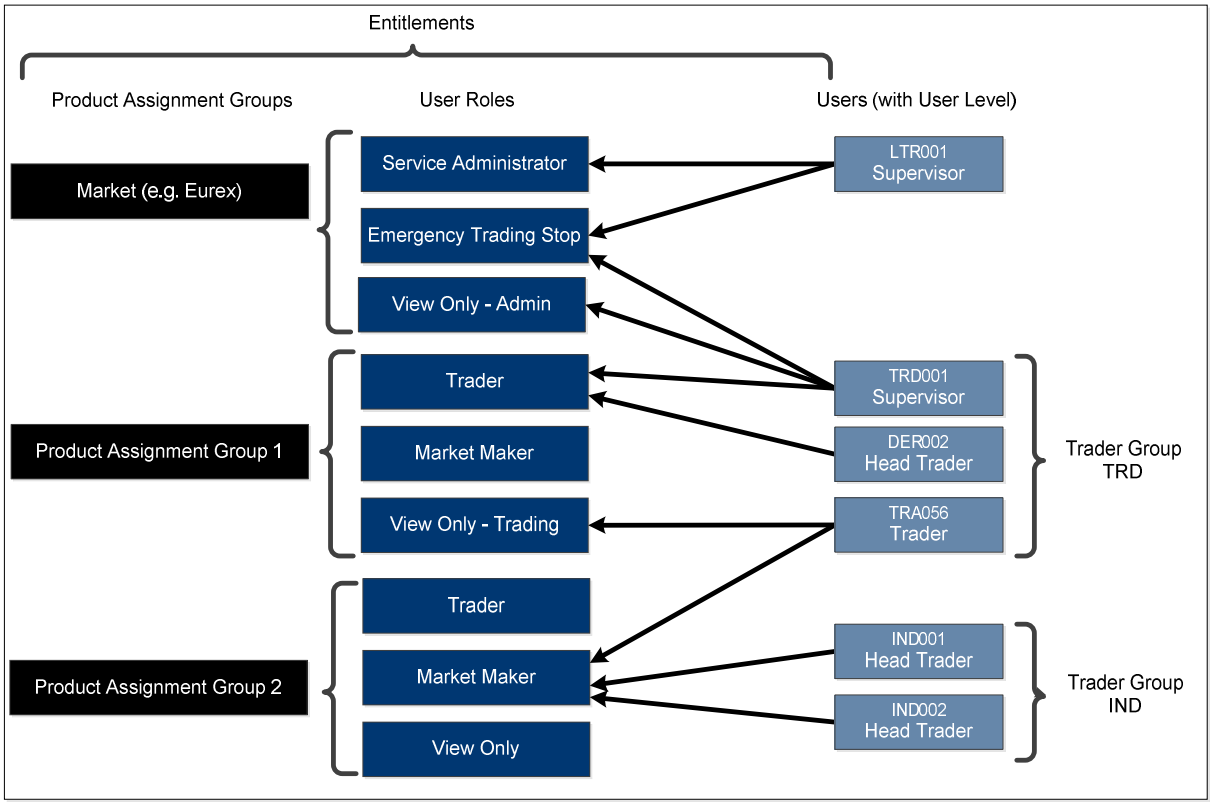

2.5 Entitlements

Participants entitle users for specific user roles for specific product assignment groups.

For example, user TRD001 has a supervisor user level and has been entitled to a trader role for product assignment group 1 and emergency trading stop and user data view roles for the entire market. User TRA056 has been entitled to a trading view role in product assignment group 1 and a market maker role in product assignment group 2.

Participants can assign users to more than one role, however certain restrictions apply that are described further in section 3.

The following diagram shows some example combinations of entitlements:

2.6 Transaction Size Limits

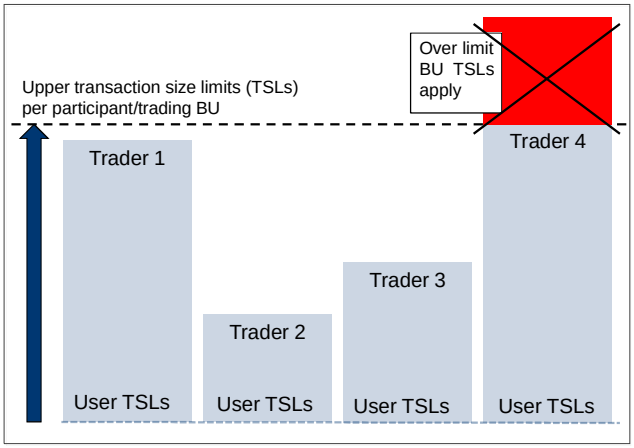

Participants can restrict order and quote quantities using transaction size limits (maximum order quantities).

Clearing members administer maximum order quantities for members in the Eurex Clearing system. Member maximum order quantities are automatically synchronized with Eurex Exchange's T7 to become transaction size limits for the trading business unit.

Transaction size limits for a specific user and product are maintained by participants themselves, using the Eurex Admin GUI, and the following values can be configured:

- Maximum order quantity
- Maximum calendar spread quantity
- Maximum TES quantity

If the values entered exceed the limits established for the trading business unit, the lower limits will apply:

Default transaction size limits can be configured for a user and product assignment group, and will be inherited for all new products added to the group.

Note that maximum TES quantity for Eurex Trade Entry Services on member level is maintained in the Eurex Clearing system, and is not included in T7.

TES Transaction Size Limits on participant level (set by GCM) will initially be migrated based on the respective settings in Eurex Clearing classic system on 09. November 2016 (end-of-day). Modifications done after this date will not be taken into account before 22. November 2016.

2.7 User Levels (Scope of Orders)

2.7.1 On-exchange trading

Every user is designated to have one (and only one) user level: trader, head trader or supervisor. Users enter their own orders, and their user level defines which orders they are authorized to act upon (scope of orders):

User Level	Scope of Orders
1 – Trader	Modify and delete own orders only.
2 – Head Trader	Modify and delete own orders, as well as orders entered by other users in the same user group.
3 – Supervisor	Modify and delete own orders, as well as orders entered by other users in the entire business unit.

An order entered into Eurex Exchange's T7 belongs to the entering user. If a second user changes this order, ownership of this order will transfer to the second user. Only exchange Market Supervision can enter an order on behalf of another user.

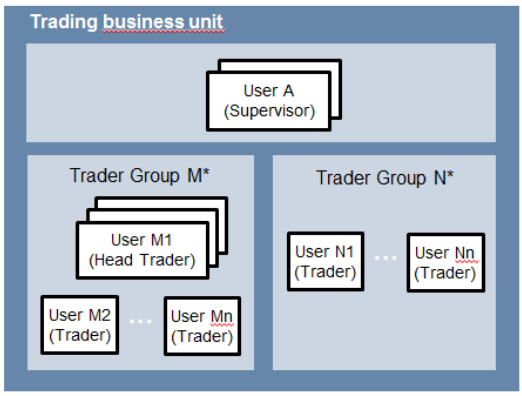

When using the new Eurex Trader GUI, the user level affects which orders and trades a user is able to view. For example, a trader can view only their trades, whereas a head trader can view all trades within the user group.

Quotes are entered using Eurex ETI sessions. The context to modify or delete quotes is defined by the session used. For orders, the entering session also defines what orders can be viewed, modified and deleted by others (e.g. modification by another session of the same business unit is only supported for standard orders). For further information, please refer to the document “Eurex Enhanced Trading Interface – Manual”.

Participants define the user structure themselves, to reflect their business operations and practices. One or more supervisors can be defined, who are entitled to perform actions for the entire trading business unit.

One or more user groups can optionally be defined. More than one head trader can be set up in a user group, and a supervisor may or may not be assigned to a user group. Users can belong to one user group only.

The following diagram shows an example of user levels contained within user groups, contained within a trading business unit:

Please note that users can only act upon orders in product assignment groups for which they are entitled, regardless of their user level (entitlement overrides user level), see 2.5.

2.7.2 TES functionality

The behavior for TES is slightly different to the one for on-exchange trading.

A user level is a mandatory user attribute which determines a user's right to perform TES maintenance actions for other users from the same business unit or from the same user group:

User Level	Scope of (TES) Trades
1 – Trader	Delete and approve own TES trades only.
2 – Head Trader	A user with a user level of Head Trader may delete TES Trades of any Initiating user belonging to the same user group and approve TES sides of any Approving Trader belonging to the same user group.
3 – Supervisor	A user with a user level of Supervisor may delete TES Trades of any Initiating user belonging to the same business unit and approve TES sides of any Approving Trader belonging to the same business unit.

Remark: Please keep in mind that the user group concept replaces the subgroup concept for TES trading with the introduction of release 4.0 (as already used for On-Exchange trading). User Level is now validated against the user group and no longer against the subgroup. As a result (depending on the setup of the user), it might be that a user can no longer see or maintain TES trades from another user.

Example 1: User A is set up with level "Trader" in T7 and has the same subgroup as user B. Currently this user sees TES trades from user B. After the TES Migration, user A can see only his own TES trades.

Example 2: User C is set up with level "Head Trader" in T7 and has a different user group than user D (but same subgroup). Currently user C can see TES trades from user D. After the migration, user C can not see TES trades from user D, since he has a different user group.

3. Pre-defined User Roles

This chapter describes the pre-defined user roles available to participants in Eurex Exchange's T7:

- Service Administrator
- User Data View
- Trader
- Market Maker
- Trading View
- Emergency Trading Stop
- Emergency Mass Deletion
- Trade Enrichment Rule
- Trade Enrichment Rule View
- Pre-trade Limits
- Pre-trade Limits View
- Market Maker Protection
- TES Trader
- TES Broker
- TES View

A summary of user roles and resource assignments can be found in the appendix (see 6).

A user is granted entitlements for specific roles for specific product assignment groups. Some roles are only applied market wide (in T7 GUI referred as on-exchange attributes).

Product Assignment Group	Service Admin.	User Data View	Emergency Trading Stop	Emergency Mass Delete	Trade Enrichment Rule / View	Pre-Trade Limits / View
Market Wide	✔	✔	✔	✔	✔	✔

The following are examples of role assignments for on-exchange trading and TES functionality:

Product Assignment Group	Trader	Market Maker	Trading View	TES Trader	TES Broker	TES View
ENSOEE	✔					✔
SNSOEC	✔			✔	✔	
BFFHIE		✔				
XNCOQE		✔				
XACFQU			✔			

3.1 Service Administrator

Participants appoint one or more service administrators to create and maintain all types of users. This includes resetting passwords, assigning entitlements and setting transaction size limits (including default transaction size limits). Please note that new trading users must be activated by the exchange.

Service Administrators can also maintain PINs for the users.

The following table shows the specific resources assigned to the service administrator role:

Resource	Role	Resource	Role
Add order		View Trade Enrichment Rules	
Modify Order		Maintain Pre-Trade Limits	
Delete Order		View Pre-Trade Limits	
Delete all Orders		Stop trading for Business Unit	
Mass Quote		Release trading for Business Unit	
Delete All Quotes		Stop Trading for User	
Quote De(Activation)		Release Trading for User	
Modify Market Maker Protection		Delete All Orders / Quotes for All Products	
Add Complex Instrument		TES Entry	
Cross Request		TES Modify	
Quote Request		TES Broker	
Inquire Market Maker Parameter		TES Delete	
Maintain Users	✔	TES Approve	
View Users	✔	TES View	
Delete All for STOP Trading		TES Type Eligibility Maintenance	✔
Maintain Trade Enrichment Rules		TES Type Eligibility View	✔

A service administrator user may also be assigned additional roles:

- One of a Trader, Market Maker or Trading View role (per product assignment group)
- Emergency Trading Stop role
- Emergency Mass Deletion role
- Trade Enrichment Rule role
- Trade Enrichment Rule View role
- Pre-Trade Limits role
- Pre-Trade Limits View role
- Market Maker Protection role
- TES Trader role
- TES Broker role
- TES View role

In order to assign the emergency trading stop role to a service administrator, the user level must be set to supervisor. The service administrator role is assigned to an entire market, not a product assignment group.

The service administrator role enables the viewing of all users and entitlements (it is not required to also entitle the user data view).

For new participants, Eurex Exchange generates the first service administrator user.

3.2 User Data View

A user data view role is available to enable a user to view all users, entitlements and transaction size limits, without update capability. The user data view role is assigned to an entire market, not a product assignment group.

The following table shows the specific resources assigned to the user data view role:

Resource	Role	Resource	Role
Add order		View Trade Enrichment Rules	
Modify Order		Maintain Pre-Trade Limits	
Delete Order		View Pre-Trade Limits	
Delete all Orders		Stop trading for Business Unit	
Mass Quote		Release trading for Business Unit	
Delete All Quotes		Stop Trading for User	
Quote De(Activation)		Release Trading for User	
Modify Market Maker Protection		Delete All Orders / Quotes for All Products	
Add Complex Instrument		TES Entry	
Cross Request		TES Modify	
Quote Request		TES Broker	
Inquire Market Maker Parameter		TES Delete	
Maintain Users		TES Approve	
View Users	✔	TES View	
Delete All for STOP Trading		TES Type Eligibility Maintenance	
Maintain Trade Enrichment Rules		TES Type Eligibility View	✔

3.3 Trader

The trader role enables order handling functions, cross requests, quote requests, and adding of complex instruments.

Mass quoting and quote (de)activation is not allowed for a trader role, and therefore defined with negative entitlement, see 2.4.

The trader role is assigned to specific product assignment groups.

The following table shows the specific resources assigned to the trader role:

Resource	Role	Resource	Role
Add order	✔	View Trade Enrichment Rules	
Modify Order	✔	Maintain Pre-Trade Limits	
Delete Order	✔	View Pre-Trade Limits	
Delete all Orders	✔	Stop trading for Business Unit	
Mass Quote	Neg. Entitlement	Release trading for Business Unit	
Delete All Quotes		Stop Trading for User	
Quote De(Activation)	Neg. Entitlement	Release Trading for User	
Modify Market Maker Protection		Delete All Orders / Quotes for All Products	
Add Complex Instrument	✔	TES Entry	
Cross Request	✔	TES Modify	
Quote Request	✔	TES Broker	
Inquire Market Maker Parameter		TES Delete	
Maintain Users		TES Approve	
View Users		TES View	
Delete All for STOP Trading		TES Type Eligibility Maintenance	
Maintain Trade Enrichment Rules		TES Type Eligibility View	

3.4 Market Maker

The market maker role enables all quoting and order handling functions, cross requests, and adding of complex instruments. Quote request is not allowed for a market maker role, and is therefore defined with negative entitlement.

A user must not be assigned both a trader role and a market maker role for the same product assignment group. Doing so will result in a conflict of negative entitlements, and block the mass quote, quote (de)activation and quote request functions entirely for that user for the product assignment group.

The market maker role is assigned to specific product assignment groups.

The market maker role does not include the modification of market maker protection parameters. This resource was taken out and added to the new role “Market Maker Protection” (chapter 3.12). As a result members are able to separate market making from the maintenance of these parameters.

The following table shows the specific resources assigned to the market maker role:

Resource	Role	Resource	Role
Add order	✔	View Trade Enrichment Rules	
Modify Order	✔	Maintain Pre-Trade Limits	
Delete Order	✔	View Pre-Trade Limits	
Delete all Orders	✔	Stop trading for Business Unit	
Mass Quote	✔	Release trading for Business Unit	
Delete All Quotes	✔	Stop Trading for User	
Quote De(Activation)	✔	Release Trading for User	
Modify Market Maker Protection		Delete All Orders / Quotes for All Products	
Add Complex Instrument	✔	TES Entry	
Cross Request	✔	TES Modify	
Quote Request	Neg. Entitlement	TES Broker	
Inquire Market Maker Parameter	✔	TES Delete	
Maintain Users		TES Approve	
View Users		TES View	
Delete All for STOP Trading		TES Type Eligibility Maintenance	
Maintain Trade Enrichment Rules		TES Type Eligibility View	

Note that the mass quote resource includes all functions to enter and modify single and multiple quotes.

3.5 Trading View

The trading view role only applies to users of the Eurex Trader GUI and provides restricted display access to trading data in the Market View, Order View, Trade View Time & Sales View and Ticker View windows. The trading view role is assigned to specific product assignment groups, and is not required if a user is already assigned a trader or market marker role.

The Eurex Trader GUI displays market information only for products that the user is assigned a trading view, trader or market maker role for the corresponding product assignment group.

3.6 Emergency Trading Stop

The emergency trading stop role enables risk control functions to stop trading for a user or the entire business unit, and automatically delete orders and quotes.

In addition, the following TES trades will be deleted if the business unit / user is stopped -> All TES trades where a stopped user is involved and where the TES trade is not yet finally approved. That includes TES trades where the stopped user has already approved the TES trade, but any other counterpart has not done this yet.

In case a business unit is stopped, this applies to all users of the business unit.

The emergency trading stop role can be added to supplement any other role, as long as the user level is set to supervisor. The emergency trading stop role is assigned to an entire market, not a product assignment group.

Participants must have at least two users with the emergency trading stop role in order to stop a user or business unit from trading; stop trading functions use the four-eyes principle as a safeguard, see 5.4.

The following table shows the specific resources assigned to the emergency trading stop role:

Resource	Role	Resource	Role
Add order		View Trade Enrichment Rules	
Modify Order		Maintain Pre-Trade Limits	
Delete Order		View Pre-Trade Limits	
Delete all Orders		Stop trading for Business Unit	✔
Mass Quote		Release trading for Business Unit	✔
Delete All Quotes		Stop Trading for User	✔
Quote De(Activation)		Release Trading for User	✔
Modify Market Maker Protection		Delete All Orders / Quotes for All Products	
Add Complex Instrument		TES Entry	
Cross Request		TES Modify	
Quote Request		TES Broker	

Inquire Market Maker Parameter		**TES Delete**	
Maintain Users		**TES Approve**	
View Users		**TES View**	
Delete All for STOP Trading	✔	**TES Type Eligibility Maintenance**	
Maintain Trade Enrichment Rules		**TES Type Eligibility View**	

3.7 Emergency Mass Deletion

The emergency mass deletion role enables the market wide deletion of all orders and quotes for all products via the Eurex Trader GUI or the Eurex Admin GUI. This functionality has no impact on TES trades. It only applies to on-exchange trading.

Deletion of orders can be performed for a specific user or for the entire business unit. The scope of orders allowed to be selected for deletion is controlled by the assigned user level, see 2.7. For example, trader level can mass delete own orders only, and supervisor level can mass delete all orders for an entire business unit.

The user level is not relevant for mass deletion of quotes. With this role assigned, any user level can delete all quotes for the entire business unit.

The emergency mass deletion role can be added to supplement any other role, and is assigned to an entire market, not a product assignment group.

The following table shows the specific resources assigned to the emergency mass deletion role:

Resource	Role	Resource	Role
Add order		**View Trade Enrichment Rules**	
Modify Order		**Maintain Pre-Trade Limits**	
Delete Order		**View Pre-Trade Limits**	
Delete all Orders		**Stop trading for Business Unit**	
Mass Quote		**Release trading for Business Unit**	
Delete All Quotes		**Stop Trading for User**	
Quote De(Activation)		**Release Trading for User**	
Modify Market Maker Protection		**Delete All Orders / Quotes for All Products**	✔
Add Complex Instrument		**TES Entry**	
Cross Request		**TES Modify**	
Quote Request		**TES Broker**	
Inquire Market Maker Parameter		**TES Delete**	
Maintain Users		**TES Approve**	
View Users		**TES View**	
Delete All for STOP Trading		**TES Type Eligibility Maintenance**	
Maintain Trade Enrichment Rules		**TES Type Eligibility View**	

3.8 Trade Enrichment Rule

A trade enrichment rule role is available to enable a user to view and maintain trade enrichment rules for the entire business unit, using the Eurex Admin GUI. Trade enrichment rules are a new feature of Eurex Exchange's T7, and are used for automatic enrichment of executed quotes, and executed orders that use the short order message layout. The trade enrichment rule role is assigned to an entire market, not a product assignment group.

This functionality has no impact on TES trades. It only applies to on-exchange trading.

The trade enrichment rule role can be added to supplement any other role. Without this role, individual users are unable to view or maintain trade enrichment rules.

For information about trade enrichment rules functionality, please refer to the document "Eurex Functional and Interface Overview".

The following table shows the specific resources assigned to the trade enrichment rule role:

Resource	Role	Resource	Role
Add order		View Trade Enrichment Rules	✔
Modify Order		Maintain Pre-Trade Limits	
Delete Order		View Pre-Trade Limits	
Delete all Orders		Stop trading for Business Unit	
Mass Quote		Release trading for Business Unit	
Delete All Quotes		Stop Trading for User	
Quote De(Activation)		Release Trading for User	
Modify Market Maker Protection		Delete All Orders / Quotes for All Products	
Add Complex Instrument		TES Entry	
Cross Request		TES Modify	
Quote Request		TES Broker	
Inquire Market Maker Parameter		TES Delete	
Maintain Users		TES Approve	
View Users		TES View	
Delete All for STOP Trading		TES Type Eligibility Maintenance	
Maintain Trade Enrichment Rules	✔	TES Type Eligibility View	

3.9 Trade Enrichment Rule View

A trade enrichment rule view role is available to enable a user to view all trade enrichment rules without update capability. The trade enrichment rule view role is assigned to an entire market, not a product assignment group.

This functionality has no impact on TES trades. It only applies to on-exchange trading.

The following table shows the specific resources assigned to the trade enrichment rule view role:

Resource	Role	Resource	Role
Add order		View Trade Enrichment Rules	✔
Modify Order		Maintain Pre-Trade Limits	
Delete Order		View Pre-Trade Limits	
Delete all Orders		Stop trading for Business Unit	
Mass Quote		Release trading for Business Unit	
Delete All Quotes		Stop Trading for User	
Quote De(Activation)		Release Trading for User	
Modify Market Maker Protection		Delete All Orders / Quotes for All Products	
Add Complex Instrument		TES Entry	
Cross Request		TES Modify	
Quote Request		TES Broker	
Inquire Market Maker Parameter		TES Delete	
Maintain Users		TES Approve	
View Users		TES View	
Delete All for STOP Trading		TES Type Eligibility Maintenance	
Maintain Trade Enrichment Rules		TES Type Eligibility View	

3.10 Pre-Trade Limits

A pre-trade limits role is available to enable a user to view and maintain pre-trade limits for the entire business unit, using the Eurex Admin GUI. Pre-trade limits are a new feature of Eurex Exchange's T7 that enable participants to set functional limits on the number of open orders and quote sides stored in an order book for a business unit and session.

This functionality has no impact on TES trades. It only applies to on-exchange trading.

The pre-trade limits role can be added to supplement any other role. Without this role, individual users are unable to view or maintain pre-trade limits.

For information about pre-trade limits functionality, please refer to the document "Eurex Functional and Interface Overview".

The following table shows the specific resources assigned to the pre-trade limits role:

Resource	Role	Resource	Role
Add order		View Trade Enrichment Rules	
Modify Order		Maintain Pre-Trade Limits	✔
Delete Order		View Pre-Trade Limits	✔
Delete all Orders		Stop trading for Business Unit	
Mass Quote		Release trading for Business Unit	
Delete All Quotes		Stop Trading for User	
Quote De(Activation)		Release Trading for User	
Modify Market Maker Protection		Delete All Orders / Quotes for All Products	
Add Complex Instrument		TES Entry	
Cross Request		TES Modify	
Quote Request		TES Broker	
Inquire Market Maker Parameter		TES Delete	
Maintain Users		TES Approve	
View Users		TES View	
Delete All for STOP Trading		TES Type Eligibility Maintenance	
Maintain Trade Enrichment Rules		TES Type Eligibility View	

3.11 Pre-Trade Limits View

A pre-trade limits view role is available to enable a user to view all pre-trade limits without update capability. The pre-trade limits view role is assigned to an entire market, not a product assignment group.

This functionality has no impact on TES trades. It only applies to on-exchange trading.

The following table shows the specific resources assigned to the pre-trade limits view role:

Resource	Role	Resource	Role
Add order		View Trade Enrichment Rules	
Modify Order		Maintain Pre-Trade Limits	
Delete Order		View Pre-Trade Limits	✔
Delete all Orders		Stop trading for Business Unit	
Mass Quote		Release trading for Business Unit	
Delete All Quotes		Stop Trading for User	
Quote De(Activation)		Release Trading for User	
Modify Market Maker Protection		Delete All Orders / Quotes for All Products	
Add Complex Instrument		TES Entry	
Cross Request		TES Modify	
Quote Request		TES Broker	
Inquire Market Maker Parameter		TES Delete	
Maintain Users		TES Approve	
View Users		TES View	
Delete All for STOP Trading		TES Type Eligibility Maintenance	
Maintain Trade Enrichment Rules		TES Type Eligibility View	

3.12 Market Maker Protection

A user with this role is able to maintain market maker protection parameters and to delete quotes.

This new role was implemented to enable members to separate the trading (market maker role) from the risk control (market maker protection role).

Resource	Role	Resource	Role
Add order		View Trade Enrichment Rules	
Modify Order		Maintain Pre-Trade Limits	
Delete Order		View Pre-Trade Limits	
Delete all Orders		Stop trading for Business Unit	
Mass Quote		Release trading for Business Unit	
Delete All Quotes	✔	Stop Trading for User	
Quote De(Activation)		Release Trading for User	
Modify Market Maker Protection	✔	Delete All Orders / Quotes for All Products	
Add Complex Instrument		TES Entry	
Cross Request		TES Modify	
Quote Request		TES Broker	
Inquire Market Maker Parameter	✔	TES Delete	
Maintain Users		TES Approve	
View Users		TES View	
Delete All for STOP Trading		TES Type Eligibility Maintenance	
Maintain Trade Enrichment Rules		TES Type Eligibility View	

3.13 TES Trader

The TES Trader role enables the entry, modification, deletion and the approval of TES trades.

This role is used if the entering user is directly participating in a TES trade, where the TES Broker role is used where the user is not a part of the TES trade. A user can have both roles assigned.

The TES Trader role is assigned to specific product assignment groups.

The following table shows the specific resources assigned to the TES Trader role:

Resource	Role	Resource	Role
Add order		View Trade Enrichment Rules	
Modify Order		Maintain Pre-Trade Limits	
Delete Order		View Pre-Trade Limits	
Delete all Orders		Stop trading for Business Unit	
Mass Quote		Release trading for Business Unit	
Delete All Quotes		Stop Trading for User	
Quote De(Activation)		Release Trading for User	
Modify Market Maker Protection		Delete All Orders / Quotes for All Products	
Add Complex Instrument	✔	TES Entry	✔
Cross Request		TES Modify	✔
Quote Request		TES Broker	
Inquire Market Maker Parameter		TES Delete	✔
Maintain Users		TES Approve	✔
View Users		TES View	✔
Delete All for STOP Trading		TES Type Eligibility Maintenance	
Maintain Trade Enrichment Rules		TES Type Eligibility View	

3.14 TES Broker

The TES Broker role enables the entry (as a broker), modification and deletion of TES trades.

This role is used if the entering user is NOT directly participating in the TES trade, where the TES Trader role is used where the user is part of the TES trade. A user can have both roles assigned.

The TES Broker role is assigned to specific product assignment groups.

The following table shows the specific resources assigned to the TES Broker role:

Resource	Role	Resource	Role
Add order		View Trade Enrichment Rules	
Modify Order		Maintain Pre-Trade Limits	
Delete Order		View Pre-Trade Limits	
Delete all Orders		Stop trading for Business Unit	
Mass Quote		Release trading for Business Unit	
Delete All Quotes		Stop Trading for User	
Quote De(Activation)		Release Trading for User	
Modify Market Maker Protection		Delete All Orders / Quotes for All Products	
Add Complex Instrument	✔	TES Entry	
Cross Request		TES Modify	✔
Quote Request		TES Broker	✔
Inquire Market Maker Parameter		TES Delete	✔
Maintain Users		TES Approve	
View Users		TES View	✔
Delete All for STOP Trading		TES Type Eligibility Maintenance	
Maintain Trade Enrichment Rules		TES Type Eligibility View	

3.15 TES View

The TES view role only applies to users of the Eurex Trader GUI and provides restricted display access to TES trading data in the TES View window. The TES view role is assigned to specific product assignment groups and is not required if a user is already assigned a TES trader or TES Broker role.

4. TES Type Eligibility

The TES Type Eligibility on T7 is used to control access to the various TES Types

- Block Trade (includes FLEX, Basis Trade and Trade at Market (TAM))
- Exchange for Physicals (EFP) Fin
- Exchange for Physicals (EFP) Index
- Exchange for Swaps (EFS)
- Vola Trade

“EFP-Fin” and “EFPI” are now separated. Flex Contracts are now included in TES Type “Block Trade”.

TES Type Eligibility is set both on participant level and on user level.

The participant level assignment is done by the Eurex Exchange based on the existing TES application process (Declaration – Agreement of the General Clearer for Utilization of Eurex Trade Entry Services (for GCM) and Acceptance of the Conditions for Utilization of Eurex Trade Entry Services (for NCM).

The service administrator can then assign the TES Type Eligibility to the user. This is done in the GUI, using the User Maintenance screen (screen was enhanced by TES Type Eligibility as well as TES roles and TSL maintenance).

FYI:

This functionality replaces the Eurex Clearing classic system logic, where access control was done by setting the respective Resource Access Levels (RAL) to the required level.

TES Type Eligibility on participant level (set by GCM) will initially be migrated based on the respective RAL settings in Eurex Clearing classic system on 09. November 2016 (end-of-day). Modifications done after this date will not be taken into account and have to performed again after the introduction of release 4.0.

5. Maintenance

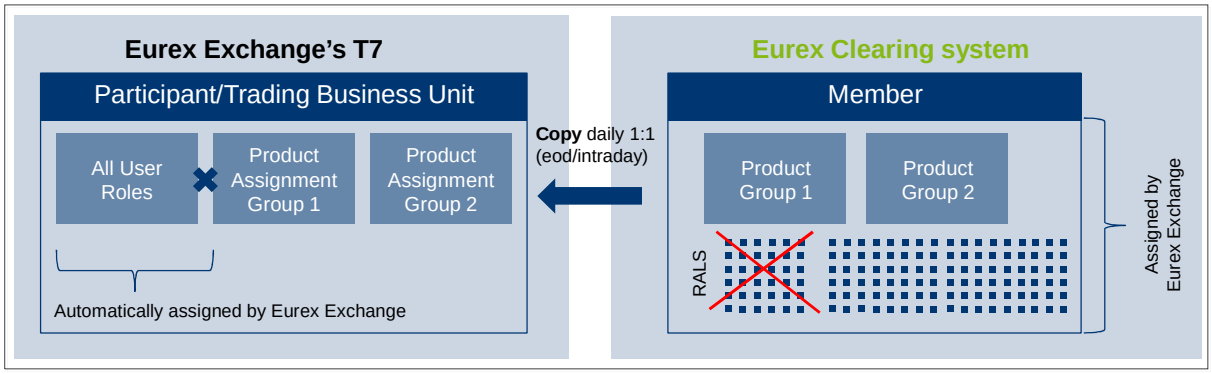

This chapter describes the maintenance functions that will be performed by service administrators.

Data related to product assignment groups, participants, business units, users and risk controls will be made available to service administrators, including all identifiers needed for all interfaces.

5.1 Product Assignment Groups

Product assignment groups are created and maintained by Eurex Exchange in the Eurex Clearing system, and automatically synchronized with Eurex Exchange's T7.

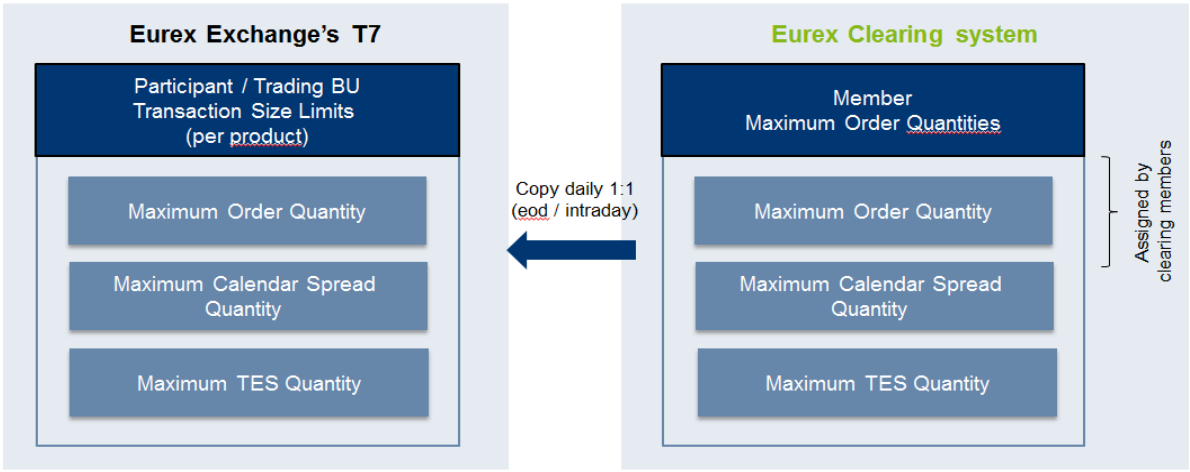

The concept of RALS in the Eurex Clearing system is replaced by user roles in T7. For participant / trading business unit, the exchange will automatically enable all eligible user roles for every product assignment group the member is allowed to trade, so that participants can then entitle their users.

5.2 Participant and Business Unit

The participant and business unit structure is created and maintained by Eurex Exchange.

Clearing members maintain transaction size limits for their trading members in the Eurex Clearing system, using maximum order quantities (intra-day updates are supported). T7 synchronizes with the Eurex Clearing system and creates corresponding transaction size limits at the trading business unit level, on a per product basis:

5.3 Users

This section describes the steps necessary to maintain users of Eurex Exchange's T7.

Authorization can be configured by service administrators, as follows:

Type of restriction	Achieved by
Restrict products	Product assignment groups, see 2.1 (also transaction size limits for product level)
Restrict functions	User roles (e.g. market maker or trading view), see 2.4
Restrict quantities traded	Transaction size limits, see 2.6
Restrict scope of orders	User levels (trader, head trader, supervisor), see 2.7
Restrict scope of TES Types	TES Type Eligibility, see chapter 4

Viewing restrictions apply to users of the Eurex Trader GUI; these restrictions may not be implemented in alternative applications that access T7 via the electronic interfaces.

5.3.1 Adding a user

Service administrators are able to add users themselves, according to the following steps:

#	Task	Description
1	**Apply for Trader Admission**	Participants must apply for admission for all trading users (trader role or market maker role). For the TES functionality, it is sufficient to inform the Eurex Exchange about the real user name, e-mail and phone number. This is done using the eXAS (Electronic Exchange Admission Service) tool available in the Eurex member section. This step can be skipped if the user is a non-trading on-exchange user or a simulation user.
2	**Apply for user**	This is mandatory for all trading users and TES users and strongly recommended for non-trading users. This is done using the eXAS tool available in the Eurex member section. This step is not applicable to simulation users.

#	Task	Description
3	**Create user in Eurex Exchange's T7**	Using the Eurex Admin GUI, a User Setup Wizard will guide service administrators through the necessary steps, to add: · User attributes (e.g. name, user level, user group, etc.) · Entitlements (roles per product assignment groups) · Transaction size limits · TES Type Eligibility · PIN · Initial password, either entered manually, or automatically generated (for password rules, see 5.3.3) Trading users and TES users must be activated by Eurex Exchange before they can trade using T7. A unique numeric user ID will be generated for each user and is available for display and export on the Eurex Admin GUI, as well as on reports RD110, RD115, RD120 and RD125 available in the Common Report Engine. These numeric identifiers are used in all of the electronic interfaces to T7 (Eurex ETI and Eurex FIX Gateway).
4	**Activate user** **(done by exchange)**	Prior to activation, new trading users will be assigned a negative entitlement "Trader Examination Role" that will prevent trading activity as well as a negative entitlement "TES Examination Role" that will prevent TES activities. Eurex Exchange will activate trading users when the admission process and all above steps are completed. Eurex Exchange will activate TES users the day after the user application is completed in eXAS and the user is set up as TES user in T7. Simulation users are activated upon request, by emailing clearingdata@eurexchange.com. Non-trading users can immediately begin using T7 after the user is created (step #3 above).

5.3.2 Modifying a user

Using the Eurex Admin GUI, service administrators may modify user information. If a non-trading user is updated to become a trading user, there must be a trader admission, see 5.3.1, step #1.

Modifications to the user attributes (transaction size limits,entitlement,TES Type Eligibility, user group, user level and password resets) are effective immediately. Users must log out and then log back in for these changes to take effect.

5.3.3 Password Rules

User password requirements for Eurex Exchange's T7 are:

- minimum of 8 and a maximum of 16 characters
- valid characters: [a-z, A-Z, 0-9] and special characters: ['+', '-', '@', '!', '_', '$', '%', '&', '/', '=', '*','#']
- minimum 1 uppercase letter and minimum 1 lowercase letter
- minimum 1 special character
- maximum number of repeated characters allowed is 6
- a password history is maintained to prevent the last 10 passwords from being re-used.

User passwords do not automatically expire. Users are able to change their passwords themselves. Passwords can only be changed using the GUI.

Passwords generated during setup of new users and passwords generated during password reset by Service Administrator will automatically expire after first login. The user is then forced to create a new password.

Participants are responsible for the regular refresh of user passwords, according to their own security guidelines.

5.3.4 Deleting a user

Service administrators may delete users, according to the following steps:

#	Task	Description
1	**Notify Exchange**	Eurex Exchange should be notified of all user deletions. This is required for all trading and non-trading users, using the eXAS tool. This step is not applicable for simulation users.
2	**Delete user**	User deletions are done using the Eurex Admin GUI and are effective for the next day (but user login is prevented immediately).

Before deleting a user, participants should ensure that there are no open orders remaining in the system that were entered by this user. Any open orders for deleted users are automatically removed at the end of the trading day.

Participants are responsible for immediate deletion of a user account, when the associated person is no longer with the organization.

5.4 Risk Controls

Risk control functions are available in Eurex Exchange's T7 for participants to stop a user or an entire business unit from trading.

Clearing members may stop one of their trading members in the Eurex Clearing system, which is automatically synchronized with T7.

Stopped users can continue to view trading activity, but are not able to enter new orders or quotes.

5.4.1 Stopping Trading for User

Users entitled to the emergency trading stop role may stop and release any user as follows:

#	Task	Description
1	**Stop Trading for user**	When a user is stopped (and confirmed), using the Admin GUI, any orders belonging to the user are immediately deleted. Note that quotes will not be deleted – quotes belong to the entering session, not a specific user. In addition, the following TES trades will be deleted if the business unit / user is stopped -> All TES trades where a stopped user is involved and where the TES trade is not yet finally approved. That includes TES trades where the stopped user has already approved the TES trade, but any other counterpart has not done this. If a stopped user is subsequently released, the user may resume trading activities. Previously deleted orders are not restored.
2	**Confirm Stop / Release** **(four-eyes principle)**	The stop and release functions require that two users, both with emergency trading stop role, execute the function. If a stopped user is subsequently released, the user may resume trading activities. Previously deleted orders are not restored.

5.4.2 Stopping Trading for a Business Unit

Users entitled to the emergency trading stop role may stop and release an entire business unit as follows:

#	Task	Description
1	**Stop Trading for business unit**	When a business unit is stopped (and confirmed), using the Admin GUI, all orders and quotes within the business unit are deleted. In addition, the following TES trades will be deleted if the business unit / user is stopped -> All TES trades where a stopped user is involved and where the TES trade is not yet finally approved. That includes TES trades where the stopped user has already approved the TES trade, but any other counterpart has not done this.

#	Task	Description
2	**Confirm Stop / Release** **(four-eyes principle)**	The stop and release functions require that two users, both with Emergency Trading Stop role, execute the function. If the stopped business unit is subsequently released, all users may resume trading activities, except for any users previously stopped individually. Previously deleted orders and quotes are not restored.

5.4.3 Clearing Member Stopping a Trading Member

Using the Eurex Clearing system, a clearing member may stop a trading member, for whom they are a designated clearing member, as follows:

#	Task	Description
1	**Stop Trading Member**	This is done using the Eurex @X-tract Clearing GUI. When a trading member is stopped, the corresponding trading business unit in T7 is automatically stopped, and all orders and quotes within the business unit are deleted. In addition, the following TES trades will be deleted if the business unit / user is stopped -> All TES trades where a stopped user is involved and where the TES trade is not yet finally approved. That includes TES trades where the stopped user has already approved the TES trade, but any other counterpart has not done this. If the stopped business unit is subsequently released in the Eurex Clearing system, all users may resume trading activities. Previously deleted orders and quotes are not restored.

6. Appendix

The following tables show the specific resources assigned to the various roles, separated by context.

6.1.1 Administrative roles

Resource / Role	Service Admin.	User Data View	Emergency Trading Stop
