As announced in Eurex Circulars 011/02, 030/02 and 035/02, support for Eurex front end installations operating under Windows NT will be terminated with the introduction of Eurex Release 6.0 on October 28, 2002.

As a contingency measure for members who may be unable to complete the migration of their Windows NT workstations to Windows 2000 or Windows XP in time for the release date, Eurex Frankfurt AG can provide a special **UNSUPPORTED** Release 6.0 Windows NT workstation front end kit. This unsupported kit will allow Windows NT workstations to operate with the new release during the release simulation, and for a limited period of time after October 28, 2002.

We would like to stress that this special kit has not been tested to the level of the supported platforms, and is not generally recommended.

In terms of the classification of front-end systems within the Common Front End Technical Overview, (Section 6.1.2) the kit is considered as a 'Possible Configuration' **for Eurex front end installations only**. It is **NOT** possible to operate a multi-market Eurex 6.0 /Xetra 7.0 workstation system under Windows NT. Multi-market Eurex Release 6.0 and a/c/e systems will be possible.

No Windows NT Release 6.0 kit will be available for @Eurex workstations

Please note that the Windows NT Release 6.0 kit is for **workstations only**, all MISS servers will need to be migrated to Windows 2000 or Sun Solaris 8 before the deployment of Release 6.0.

The Windows NT workstation kit for Eurex Release 6.0 will only be provided to members on request to Eurex Functional Member Readiness (Tel. +49 (0)69-21 01-17 00).
