Since 25 June, 2001, the Swiss stocks which act as the underlyings for stock options on Eurex are no longer traded on SWX Swiss Exchange, but on the newly created exchange Virt-x.

In the batch run on Tuesday 10 July, 2001 Eurex will change the code for the data-feed for these stocks from **XSWX to XVTX.**

This change does not affect the SMI index which will still be delivered over the XSWX feed.

Please inform your traders of this change so that their Ticker (UD) or Ticker Board (GUI) can be modified. If quote machines or other applications are in use, please check whether these also need to be modified in order to receive the data-feed.
