Xetra Release 7.1 Production
Replacement of Broadcast Server Files

December 10, 2004

Dear Sir or Madam,

On Wednesday, December 8, 2004, some members encountered problems with the receipt of order and execution confirmations. Members who entered orders in the small cap share with ISIN US46120E6023 („Intuitive Surgical Inc Registered Shares“) were affected.

In order to ensure that similar problems do not recur in future, a MISS installation update is required. This update must be performed immediately, or until December 15, 2004 at the latest.

The required replacement file for the MISS update will be distributed this evening, December 10, 2004, via the Xetra network to your production-specific MISSes.

The following files will be distributed in compressed form:

SUN: **xetrar71_hf20041209.tar.Z**
Windows: **xetrar71_hf20041209.zip**

The target transfer directories are:

SUN: **/opt/gate/transferdir/release51/sun**
Windows: **<ftp-root directory>\release51\win**

To enable a smooth data transfer, kindly note the following points:

Make sure that the MISSes of your production environment are up and running this evening to enable the data transfer.

The read and write permissions for files and folders have to be set correctly. The Xetra Front End architecture and the applications of your production environment have to be closed down as usual in the evening.

Please carry out the following steps to replace the file:

1. Make a back-up copy of the current broadcast server file ("xetrabcsrv"), so that it may be restored in case unforeseeable problems with the new version occur.

2. Make sure that the MISS architecture was closed down before updating the file. We recommend replacing the file after the close of trading.

3. Decompress the appropriate file (xetrar71_hf20041209.tar.Z for SUN and xetrar71_hf20041209.zip for Windows).

4. To install the patch for Sun Solaris or Windows, replace the current version of the affected file with the new version in the following target directories:

SUN: **/opt/gate/base90/XETRA/bin/xetrabcsrv**
Windows: **X:\opt\gate\base90\XETRA\bin\xetrabcsrv.exe**

For Sun systems, ensure that the owner and file privileges match the original.

In addition, the replacement files will be posted this evening on our website www.deutsche-boerse.com, from where they can be downloaded. On www.deutsche-boerse.com, please follow the links

Trading & Clearing > Members Only > Xetra/Floor > Xetra Software.

Installation of the update files is mandatory. In this context, please be aware that support will only be provided on the basis of the latest version.

If you have any further questions, please contact our Customer Support Team on telephone +49-69-211-1 16 40, fax +49-69-211-1 16 41.

For technical inquiries, the Technical Helpdesk Xetra is available on telephone +49-69-211-1 84 00, fax +49-69-211-1 84 01.

Yours faithfully

Jens Hachmeister Axel Birk
