Xetra® Release 7.0 June 24, 2002
Information regarding the Upgrade of Sun Solaris 8 with Hardware Revision 02/02

Dear Sir or Madam,

As already announced in Xetra circular 107/02, from the introduction of Xetra Release 7.0, Deutsche Börse AG will only support the Sun Solaris MISS and workstation installations on the basis of the operating system version Sun Solaris 8 (hardware revision 10/00, 04/01 or higher).

After the introduction of Eurex Release 6.0, which is scheduled for October 28, 2002, hardware revision 02/02 will be the minimum requirement for the operating system Sun Solaris 8 for both Xetra and Eurex.

Since the three software patches 108652-33, 108921-12 and 108940-24, whose installation was recommended in Xetra circular 107/02, are already contained in hardware revision 02/02, we suggest that the members perform the migration to Sun Solaris 8, hardware revision 02/02, now.

Effective October 28, 2002, the new minimum requirements will be mandatory in Xetra for all SUN MISSes and workstations in simulation and production.

An updated version of the ‚Sizing Guidelines' is scheduled for publication on August 16, 2002.

Also, please note that the patch „„fontset patch for sparcv9 / 112003-02“ should be installed if you intend to use the font sets „fontset iso-8859-1“ and/or „fontset iso-8859-15“ in combination with 64-bit applications. Without this patch installed, the above-mentioned font sets cannot be loaded.

Furthermore, we recommend not to use the Sun power management tools. Under specific configurations, these may obstruct operations, for example by automatically downing the equipment into the ‚sleep mode‘.

Should you have technical questions, please do not hesitate to call the Technical Helpdesk Xetra on +49(0)69-21 01-84 00.

Yours faithfully

Bernd Eschenbrücher Nicola Gastreich
