Recipients: Eurex Bonds Participants
Date: August 14, 2002
Authorized by: Dr. Johannes Weßling

Eurex Bonds Offers Trading Data in Real Time
Real-time indices in the pipeline for the first time

Dear All,

Eurex Bonds, the international electronic platform for trading in fixed-income securities, will also be offering real-time trading and quoting data via information vendors (Bloomberg, Reuters etc.) starting September 2, 2002. Hence, tradable prices (best-ask and best-bid price) as well as trading data for completed transactions (last market price) will be made available to a broad public.

Eurex Bonds is enhancing the transparency of its platform with these market data and is thus bringing a new quality to trading in German government bonds. In a next step, Eurex Bonds, in cooperation with Deutsche Börse, also wants to offer real-time indices for the first time. These real-time indices are to be based on best-bid and best-ask prices as well as the last market prices of the completed trades in fixed-income securities.

The increasing attractiveness of the Eurex Bonds trading platform, as documented by the strong rise in liquidity and turnover, has led to a growing demand for Eurex Bonds market data. The Eurex Bonds price data are distributed as a separate information product by Deutsche Börse via the CEF (Consolidated Exchange Feed) data distribution system. The subscription to Eurex Bonds data will be free of charge up to and including February 2003.
Information provider-mnemonics are presently unkown and will be published seperately in due time.

Kind regards,
Eurex Bonds
