Xetra Release 8.1
Hotfix Xetra 8.1 – Please install as of Saturday, October 20, 2007
Publication of "Points of Interest" in conjunction with
Xetra 8.1 Release Introduction

Dear Sir or Madam,

On **Thursday, October 18, 2007**, after close of trading, we will distribute a production hotfix (replacement file) for Xetra Release 8.1 to each member´s production environment.

For this hotfix which will ensure that Inside Market Broadcast runs smoothly under Xetra Release 8.1, it is necessary to install a replacement file on the MISS servers on October 20, 2007, after installation of the production kit for Xetra Release 8.1.

The following compressed files will be distributed:

SUN Solaris 10:	**xetrar81_hf20071017.tar.Z**
Windows Server 2003:	**xetrar81_hf20071017.zip**

The target transfer directories to which the files to be exchanged will be transmitted are:

SUN Solaris 10:	**/opt/gate/transferdir/release51/sun**
Windows Server 2003:	**<ftp-root directory>\release51\win**

To ensure smooth distribution of the kits, please note the following:

Management Board
Frank Gerstenschläger
(Chairman)
Rainer Riess
(Deputy Chairman)
Roger Müller
Jürgen Röthig

- Make sure that your Xetra production MISSes are reachable via the Xetra network without interruption from Thursday evening, **October 18, 2007** until Friday morning, **October 19, 2007**.
- Please check that the necessary read and write permissions for files and folders are set correctly.

Deutsche Börse AG will monitor the successful distribution. In case of any transfer problems, another transfer for the next day will be initiated.

In addition, the software for Xetra 8.1 Production and Simulation will be posted on the website of Deutsche Börse Group for downloading as of October 18, 2007 under the following path:

www.deutsche-boerse.com > Trading & Clearing > Members Only > Xetra/Floor > Xetra Information > Xetra Software > Xetra 8.1

To replace the file on the MISS servers after installation of Xetra 8.1 production kit, please follow the instructions contained in the "readme" file transmitted together with the kit.

Installation of the update files is mandatory.

Furthermore, we have prepared a list with issues which are of interest for the release change from Xetra 8.0 to Xetra 8.1 and are important for you. These "Points of Interest" are available with immediate effect for downloading from the Deutsche Börse Group website www.deutsche-boerse.com under the path:

Trading & Clearing > Members Only > Xetra/Floor > Xetra Information > Xetra Documentation > Xetra 8.1 > Functional

Should you have any questions, please feel free to contact the Xetra Trading Helpline at telephone +49-(0) 69-211-1 14 00.

Yours faithfully
On behalf of the Management Board

Axel Birk

Holger Patt

Enclosure

Points of Interest

TOPIC	Description of Xetra 8.1 functionality
The **OTC Alert button** in the Message Log window does not alert the receiver or the senior trader of the receiver if an OTC trade is approved.	If the Open OTC Trading window is not open, the button OTC Alert/ No OTC Alert is active. Its label is set to OTC Alert for the receiver or the senior trader of the receiver, whenever an open OTC trade or an open OTC trade with MiFID report has been entered or deleted.
The **multi-exchange login** capabiltiy using only one application will no longer be offered. User profile maintenance was changed, so colors, window positions, etc. can be stored per user ID and exchange.	Users may now save different user profiles for different exchanges (using the same login UID).
In the **MiFID Reporting window** different formats for price and quantity are used as compared to e.g. Open OTC Trade Entry window.	A price may be entered with up to 5 decimals and a quantity may be entered with up to 3 decimals.
Support of Windows 2003 on workstations.	From September 2007 onwards, Xetra will support the Windows Server 2003 operating system on workstations. In addition Xetra will also support the use of Service Pack 2 for Windows Server 2003 on both MISSes and workstations (see Xetra circular 170/2007).
