e u r e x *circular 105/99*

To: All Eurex members and vendors

Date: Frankfurt, 20th October 1999

Eurex Implementation Regulations Concerning Technical Equipment

Dear Sir or Madam,

Due primarily to the introduction of the new Eurex front end architecture with Eurex Release 3.0 it has been necessary to adapt the technical implementation regulations to cover the situation at member MISS/Workstation installations. You can find the new version of the Implementation Regulations Concerning Technical Equipment on our web-site (www.eurexchange.com) at:

"Market Place / Rules and Regulations / Technical Regulations".

Many of the differences from the regulations relating to User Device installations are a result of the terminology of the new architecture. Additionally, it is now a requirement of the Eurex Exchanges that member MISS front end installations are connected to Eurex by at least two lines. The registration of VALUES API applications announced in Circular 75/99 has also been included as a technical requirement.

Please note that this set of regulations (validity date 6th September 1999) is a supplementary set to the Implementation Regulations Concerning Technical Equipment dated 11th January 1999 which remain in force for those members continuing to use the User Device architecture.

If you have any questions please contact Eurex Member Readiness on Tel. +49 (0)69-2101-1700.

Yours sincerely,

Jürg Spillmann

Hartmut Klein
