3 CLOSING REMARKS 9

1 Introduction

The pricing model in its respectively valid version is – as provided in §5 (1) of the connection agreement - part of the Connection Agreement between Eurex Bonds GmbH and any Market Participant of Eurex Bonds.

All fees according to this pricing model are net fees. Since value added taxes vary for different services and member locations, they are calculated individually for each service and each member location on Eurex Bonds invoices.

2 Pricing Model

The Eurex Bonds Pricing Model differentiates between five different kinds of fees: annual fees, transaction fees, connection fees, mistrade fees and training fees.

2.1 Annual Fees

Eurex Bonds charges an annual fee for providing the software, the releases and technical and functional support. The applicable time-frame for the annual fee is the calendar year.

- All Eurex Bonds members who are shareholders are charged an annual fee of € 100,000.
- All Eurex Bonds members who are not shareholders are charged an annual fee of € 25,000.

The annual fee is billed once a year and is included in the first monthly invoice for the current calendar year.

2.2 Transaction Fees

The transaction fees per million traded volume for a given trade depend on three factors:

- Shareholder / Non-Shareholder
- Aggressor / Non-Aggressor (on a per trade level)
- Trading segment

In the following sections the three factors are defined in detail. A table with the fee per million for each relevant factor combination is provided thereafter.

Transaction fees are calculated on the basis of the nominal value of each cash bond trade and cash leg out of a basis trade.

2.2.1 Factor 1: Shareholder / Non-Shareholder

Members who are shareholders in Eurex Bonds are charged lower transaction fees than members who are not shareholders.

Depending on a member being shareholder or non-shareholder for the current trade a different row in the table in section 2.2.4 is applied.

2.2.2 Factor 2: Aggressor / Non-Aggressor

For each trade, the “non-aggressor” is the counterparty which has first entered the quote or order into the system. The “aggressor” is the counterparty which accepts the existing quote or order by entering a quote or order himself.

For pre-arranged trades (done within the pre-arranged trade facility), both counterparties are considered as aggressor.

Depending on a member being aggressor or non-aggressor for the current trade a different column in the respective table in section 2.2.4 is applied.

2.2.3 Factor 3: Trading Segment

The trading segment to which the instrument traded belongs determines the applicable row in the fee table in section 2.2.4.

2.2.4 Pricing Table

	Shareholder		Non-Shareholder	
	Non-Aggressor	Aggressor	Non-Aggressor	Aggressor
All segments except Basis, Bubills, Corporate Bonds and Financials	**- 4**	**10**	**6**	**15**
Basis and Bubills	**- 8**	**12**	**- 2**	**15**
Corporate Bonds and Financials	**- 15**	**20**	**0**	**30**

The table shows the fees in Euro per million traded nominal volume. Negative fees indicate payments from Eurex Bonds to the participant.

The applicable row depends on the trading segment. The applicable column depends on whether the participant is shareholder or not and whether he is aggressor or non-aggressor for a trade (as defined in 2.2.2).

2.2.5 Additional Regulations

Eurex Bonds transaction fees do not include any clearing and settlement fees. Furthermore, fees for futures leg execution of basis trades are charged separately by Eurex Clearing AG according to the Eurex Clearing AG price list.

Clearing, e.g. the Fixed-Income-CCP functionality, is an additional service by Deutsche Börse® Group and therefore, clearing fees are billed separately by Eurex Clearing AG.

Eurex Bonds transaction fees are charged directly to every trading member of Eurex Bonds, regardless of whether the member is a Eurex Clearing member or not.

Eurex Bonds transaction fees are not linked to any Exchange Fees of the exchanges of Deutsche Börse Group (e.g. FWB, Eurex Deutschland) and cannot be offset against any such exchange fees.

2.3 Connection Fees

A Eurex Bonds member needs access to the Xetra® network of Deutsche Börse Group. Sharing an existing line for the Xetra® system with Eurex Bonds is free of charge for the Eurex Bonds member.

Through technically connecting to the Eurex Bonds trading system the member is automatically provided with the Xetra® Front End J-Trader and is granted access to price and order book information provided by Eurex Bonds without additional charges.

2.3.1 Direct Connection to the Trading System

Fees for a dedicated technical connection to the Eurex Bonds electronic trading system (connection fees) are differentiated according to the connection alternative (connection component) selected by the trading member.

Table 1: Connection component prices per month*

	Connection component	Price
1)	512 kbit/s bandwidth** of a leased line	
	(in locations with Access Point)***	1,500 €
	(in other locations)	3,000 €
2)	2 Mbit/s bandwidth of a leased line (optional as of April 23, 2007)	
	(in locations with Access Point)***	2,500 €
	(in other locations)	4,200 €
3)	512 kbit/s Internet connection****	750 €
4)	@Xetra Workstation*****	1,000 €

* Specified connection prices apply to all Inter-European connections. Connections from outside of Europe are charged with individual connection prices.

** New Eurex Bonds lines can only be ordered with a minimum bandwidth of 512 kbit/s. Existing dedicated 128 kbit/s leased lines for Eurex Bonds are still supported. The same connection fees as for 512 kbit/s lines are applied to the corresponding 128 kbit/s connection components.

*** Locations with Access Point (as of December 14, 2006): Amsterdam, Dublin, Frankfurt, Helsinki, London, Madrid, Milan, Paris, Vienna, Zurich.

**** Internet-based access with a server on the side of the member (MISS). The member instructs a provider of his own choice for Internet access and bears the resulting costs.

***** Internet-based access with a server at Deutsche Börse Systems AG (eXISS). Operation of this server is included in the price. The member instructs a provider of his own choice for Internet access and bears the resulting costs.

The total monthly connection fee is calculated by summing up single prices for the chosen connection components.

For connection with one leased line, an additional back-up connection is required in all cases. The back-up connection must have the same bandwidth as the principal line. Back-up connections in the form of @Xetra workstations are not possible.

Set-up or termination of a connection component is free of charge. Termination of a connection component is possible to the end of a month.

A change in connection alternative or connection location is charged a one-off fee of € 4,000.-.

2.3.2 Multi-Member MISS

2.3.2.1 Indirect Connection to the Trading System via Multi-Member MISS

Instead of connecting directly to the Eurex Bonds trading system, Eurex Bonds members have the opportunity to use the technical infrastructure of a Multi-Member MISS provider. Users of the Multi-Member MISS are not charged monthly connection fees (except possible fees invoiced by the provider).

2.3.2.2 Connection of a Multi-Member-MISS to the Trading System

A Multi-Member MISS may only be connected to the Eurex Bonds trading system via a leased line with an additional back-up connection. Monthly connection fees are invoiced exclusively to the provider of such Multi-Member MISS, regardless of the number of users.

2.4 Mistrade Fees

A Mistrade Transaction can be cancelled by Eurex Bonds as specified in the "Terms and Conditions for Participation and Trading on Eurex Bonds". The participant who filed a Mistrade Application shall be charged a handling fee of € 500.

All transaction and clearing fees associated with the cancelled Mistrade Transaction shall be cancelled.

2.5 Training Fees

Participants in Eurex Bonds are offered a variety of different training possibilities:

- Functional training for traders
- Technical training for system administrators

Training fees are not included in this pricing model. Please contact Eurex Bonds at the address given below if you are interested. Eurex Bonds sponsors these training sessions.

2.6 Excessive System Usage

For excessive system usage the regulations specified in Eurex Bonds Circular 16/03 apply. Eurex Bonds reserves the right to adjust the indicated parameters based upon the actual market situation. In the event of a parameter change, market participants will be informed in due time by means of a Eurex Bonds circular.

Currently Eurex Bonds does not apply the excessive system usage pricing scheme. Eurex Bonds reserves the right to activate this scheme by informing market participants within an appropriate time frame.

3 Closing Remarks

Eurex Bonds reserves the right to introduce changes or enhancements to this pricing model. Price increases will be announced 6 weeks in advance in accordance with Article 5 of the connection agreement.
