On **Wednesday, October 9, 2002** Eurex will transmit Simulation Update Kit 2 for Eurex Release 6.0 Simulation.

Target directories and required storage capacity are as follows:

SUN Solaris (MISS):	/opt/gate/transferdir/release01	13 MB (SUN) + 13 MB (Windows)
MS Windows 2000 (MISS):	<ftp-root directory>\release01	13 MB (Windows) + 13 MB (SUN)

Each Report MISS will receive both the Sun and Windows kits.

The Release 6.0 Simulation update kit contains technical and functional improvements. In particular several issues with broadcast distribution and problems relating to backward compatibility have been resolved. Installation of Simulation Update Kit 2 is therefore strongly recommended.

The update kit should be installed on MISSs and Workstations according to the instructions in the 'read-me' file which will be transferred to the appropriate directory in the simulation environment together with the update kit.

Please forward this circular to your system administrator so that the data files which are no longer required can be deleted before the software transfer (e.g. old software kits, Theoretical Price Files, Reports). Please also make sure that your simulation environment is reachable via FTP on Wednesday October 9, 2002 from 21:00 CET.

Additionally, from Thursday, October 10, 2002 the software, including the @Eurex kit, will be available for download from our web-site "www.eurexchange.com" under the path 'info for members > Eurex software kits > Release 6.0 simulation'.

Please contact our Technical help-desk on Tel. +49 (0)69 2101-1200 if you have not received the software by Thursday October 10, 2002.
