

EurexOTC Clear

Eurex Clearing offers a liquid EU-based alternative to clear EUR-denominated interest rate swaps with high-quality execution prices.

We have worked closely with both the Buy and Sell Side to design the only European offering that truly meets the needs of the market. As a result, we provide the perfect basis for your OTC business, where highest safety and efficiency are key factors – and differentiate us from other CCPs.

What are the key benefits?

Safety

- State of the art risk and default management capabilities
- Choice of strong segregation models

Capital efficiency

- A legal framework allowing for maximum risk exposure netting
- Capital efficient direct clearing models

Margin efficiency

- Portfolio margining across listed and OTC products
- Full interest rate derivatives coverage

Collateral efficiency

- Broad eligible collateral spectrum
- Integrated collateral re-use and transformation possibilities with our repo CCP services

NETTING AND COMPRESSION

The netting (risk-free compression) and risk-based compression services offered at Eurex Clearing allow market participants to reduce their outstanding gross notional by offsetting trades with opposing directions. This can significantly reduce the leverage ratio and overall cost of capital.

In addition to the capital efficiencies, there are operational benefits. It decreases the number of trades, contributes to reducing systemic risk and simplifies port-folio management by increasing operational efficiency and reducing potential administrative effort in the event of a default.

Levels of netting

Netting position parameters can be defined on a position account basis and set in the EurexOTC Clear GUI.

Basic netting	Fee netting	Rate blending
(terms must match)	(different fee schedule)	(different fixed legs)

MARGIN EFFICIENCY

Eurex Clearing Prisma calculates combined risks across the markets and venues cleared by Eurex Clearing for products that share similar risk characteristics. This allows for more accurate risk netting effects between listed and OTC positions.

Cross-product scenarios enable a consistent way to account for portfolio correlation and diversification effects.

Profit from high capital efficiencies and a strong risk management framework provided by Eurex Clearing Prisma.

COLLATERAL OFFERING

As a leading clearing house, Eurex Clearing offers best in class, diversified collateral management services. This creates maximum value for our customers while simultaneously ensuring the integrity of the clearing house.

We offer a wide range of asset classes as margin collateral. In addition, Eurex gives clients access to market leading collateral transformation services.
