Summary:

This circular contains further information on the following subjects related to the Eurex Release 4.1 simulation:

1. Distribution of Release 4.1 Simulation Update Kit

As announced in the Simulation Guide (Circular 067/00) an Update Kit for the Release 4.1 simulation software **for the MISS architecture** will be distributed to members between October 17 and October 19, 2000.

Please forward this circular to your system administrator so that any unnecessary files (e.g. Software kits, Theoretical Price Files, reports, etc.) can be removed from the directories before the Update Kit is transferred.

Due to the changes to the VALUES API interface described in Circular 083/00, the update is **mandatory** on all MISS installations. After receipt, the Update Kit can be installed at any time on the member front end installation.

2. Availability of the Java Trading GUI

In Circulars 041/00 and 067/00 we announced the availability of a Java-based Trading GUI for October 17, 2000 in simulation, and for the end of November, 2000 in production. The Java Trading GUI will only be made available to EEX-members on the dates announced.

The Java Trading GUI will not therefore be delivered with the forthcoming Eurex Release 4.1 simulation Update Kit. We will give you further news on the introduction of the Java Trading GUI supporting Eurex functions as soon as possible.

1. Distribution of Release 4.1 Simulation Update Kit

2. Availability of the Java Trading GUI

1. Distribution of Release 4.1 Simulation Update Kit

As announced in the Simulation Guide (Circular 067/00) a MISS software Update Kit for the Release 4.1 simulation will be distributed to members between October 17 and October 19, 2000. The simulation Update Kit should be installed according to the Installation Guidelines in the “Read Me” file which will be distributed with the software over the network into the simulation environment-specific distribution directory:

Target Directories and free storage requirements for file transfer:

IBM AIX (MISS):	/usr/lpp/gate/transferdir/release01	10 MB + 6 MB NT
SUN Solaris (MISS):	/opt/gate/transferdir/release01	10 MB + 6 MB NT
Windows NT (MISS):	<ftp-root directory>\release01	6 MB

Please forward this circular to your system administrator so that any unnecessary files (e.g. Software kits, Theoretical Price Files, reports, etc.) can be removed from the directories before the Update Kit is transferred.

Please make sure that your simulation environment is connected to the Eurex network on Tuesday evening, October 17, 2000 from 21.00 CET onwards.

Due to the changes to the VALUES API interface described in Circular 083/00, the update is mandatory on all MISS installations. After receipt, the Update Kit can be installed at any time on the member front end installation.

If you have not received the Update Kit by Friday October 20, 2000, or if you have any further questions, please contact our Technical Help-desk on +49 (0)69-2101-1200.

2. Availability of the Java Trading GUI

In Circulars 041/00 and 067/00 we announced the availability of a Java-based Trading GUI for October 17, 2000 in simulation, and for the end of November, 2000 in production. The Java Trading GUI will only be made available to EEX-members on the dates announced.

The Java Trading GUI will not therefore be delivered with the forthcoming Eurex Release 4.1 simulation Update Kit. We will give you further news on the introduction of the Java Trading GUI supporting Eurex functions as soon as possible.
