Procedure

R-Factor Method

Determination of adjustment factor (R-factor)

S1	Closing auction price of the share
S2	S1 minus special dividend
R-Factor	S2 / S1

Options

1. Adjustment of strike prices and contract sizes

- All existing strike prices will be multiplied by the R-factor.
- The contracts size will be divided by the R-factor.
- The version number of the existing series will be increased by one.
  Immediately after close of trading on the last cum-trading day, adjusted strike prices and contract sizes will be published on www.eurex.com in section
  Rules & Regs > Corporate actions > Corporate action information
- New series with standard contract size 100 and version number 0 will be introduced effective the ex-date.
- All existing orders and quotes will be deleted after close of trading on the last cum-trading day.
- The adjustment also refers to existing positions in TES flexible options.

2. Exercises

- Upon exercise of an adjusted series cash settlement will be made for the fractional part of the new contract size.

Futures

1. Adjustment of contract size and variation margin

- The adjustment is done via the same R-factor as for the Options
- To adjust the calculation of the variation margin of the following exchange trading day, settlement prices of the last cum-trading day will be multiplied by the R-Factor.
- The new contract size will be calculated as follows:
  Contract size new = contract size old / R-factor
- All outstanding orders and quotes will be deleted after close of trading on the last cum-trading day.
- The adjustment also refers to existing positions in TES flexible futures.

2. Introduction of a new contract

- A new single stock futures contract with standard contract size 100 will be introduced.
- The exact introduction date will be published via a circular.
- As soon as the new contract is available for trading and there are no more contract months with open interest in the original contract, trading in this contract will be put on “HALT” and finally discontinued.

- Furthermore, no new contract months will be introduced in the original contracts VOWG.

  If there is no open interest on the last cum-trading day after close of trading in one of the original contracts VOWG, no adjustment will be made for these contracts and no new contract will be introduced to replace this.
