

EUREX Architects of trusted markets

FTSE Bitcoin Index Futures

May 2023

Why crypto at Eurex?

The trusted path to crypto

The cryptocurrency market has undergone a volatile period in the past year as the industry faced an array of credit risk events. This has highlighted the importance of having trusted, regulated marketplace supporting the trading and risk management of digital assets.

In 2022, market capitalization of the asset class suffered near \$ 1 trillion loss from its peak. Despite that, major cryptocurrencies such as Bitcoin (BTC) and Ether (ETH) have remained resilient, with strong interest from professional and institutional investors.

Since the beginning of 2023, BTC and ETH are showing signs of recovery. It is now time to reconsider this asset class through the lens of a regulated marketplace.

The trusted path to crypto

Introducing Eurex Crypto Derivatives Suite

The trusted path to crypto

Eurex is expanding its cryptocurrency derivatives offering with the listing of:

Futures on FTSE Bitcoin Index (USD, EUR)

Cash settled Bitcoin index futures in EUR and USD complement the already listed BTCetc ETN Futures with physical delivery.

FTSE Russell, administers the underlying index of the Bitcoin futures, the index is **compliant with the Benchmark Regulation (BMR)**.

Digital Asset Research (DAR), collaborates with FTSE to create a set of vetting criteria that enables professional investors and market participants to benchmark digital tokens while mitigating the risks specific to this largely unregulated financial asset class.

EUREX

Our Value Proposition

Safe and trusted Trading & Clearing

Trusted Index Provider

FTSE Russell is a leading index provider with over \$3.75T of investment product assets tracking their indices. Their partner for crypto indices, Digital Asset Research (DAR), is a provider of unbiased crypto market data, research, and analysis to professional investors

Trading on a Regulated Exchange

Eurex is a renowned regulated exchange, with best-in-class trading platform and robust safeguards offering multi-asset class trading

On-screen & OTC Liquidity

Investors benefit from tight spreads provided by leading Liquidity Providers during Asian, European and US trading hours

Institutional and Professional Investors

Eurex cryptocurrency futures contracts are designed for both institutional as well as sophisticated retail investors, having 1 Bitcoin as the multiplier and cash settlement on expiry

Regional Advantage

Investors can gain cryptocurrency exposure in EUR or USD whilst trading on a European-regulated exchange, with a global investor base

Central Counterparty Clearing

All trades at Eurex are risk managed and cleared in an AA-rated clearing house, with no auto liquidations or counterparty risk

Trading and clearing of Bitcoin Index futures on Eurex

Crypto trading is supported by high-grade, time-tested infrastructure and set up

Layer	Framework	Functional Setup Overview
<p>Trading Layer</p>	<p>Crypto futures traded on Eurex Exchange / Eurex Deutschland</p>	<ul style="list-style-type: none"> ▪ Index futures with cash settlement on BTC/EUR and BTC/USD Indexes ▪ Quotation in EUR or USD ▪ Indexes provided by Benchmark Regulation(BMR) compliant Index Provider (FTSE Russel) ▪ Trading on T7 / Eurex Deutschland, incl. all trading safeguards (e.g., Volatility Interruptions) ▪ Technical set-up via cash settled index futures (FINX) product type
<p>Clearing & Settlement Layer</p>	<p>Futures on cryptocurrency index cleared in Eurex Clearing CCP, cash settlement</p>	<ul style="list-style-type: none"> ▪ Standard membership model (GCM, DCM) ▪ Cash-settlement in EUR or USD ▪ Daily settlement prices calculated per instrument from order book data (if available, otherwise theoretical pricing) ▪ Final settlement price is the contract value corresponding to the end-of-day value of the BTC/EUR and BTC/USD indexes ▪ Standard clearing, netting, position management processes for cash settled index future
<p>Risk Layer</p>	<p>Standard clearing with new liquidation group</p>	<ul style="list-style-type: none"> ▪ Margining in EUR/USD ▪ The products will be assigned to the new cryptocurrency derivatives liquidation group

FTSE DAR Index Design

VWAP calculation of all (genuine) trades across all vetted exchanges every 15 seconds

DAR delivers to FTSE the Asset Price every 15 seconds. FTSE calculates the FTSE DAR Reference Price which is a 15-minute time-weighted average price (TWAP). The FTSE DAR (EU BMR compliant) price is published hourly 24 times a day

1 Trade data is collected across all exchanges and converted into USD every 15 seconds

2 The index prices are then converted into other fiat currencies, like EUR, GBP, JPY

3 The Bitcoin futures underlying is the 17:00 CET index print

*For the latest composition of Participating Exchanges see slide 13

FTSE Bitcoin Index performance – a comparison

- The Bitcoin/fiat pairs are taken from Bloomberg as the 17:00 CET snapshots
- The FTSE Bitcoin Index values are published at 16:00 UTC (17:00 CET)

Index tickers:	Index Name	Currency	Bloomberg		Refinitiv

FTSE DAR digital exchange vetting

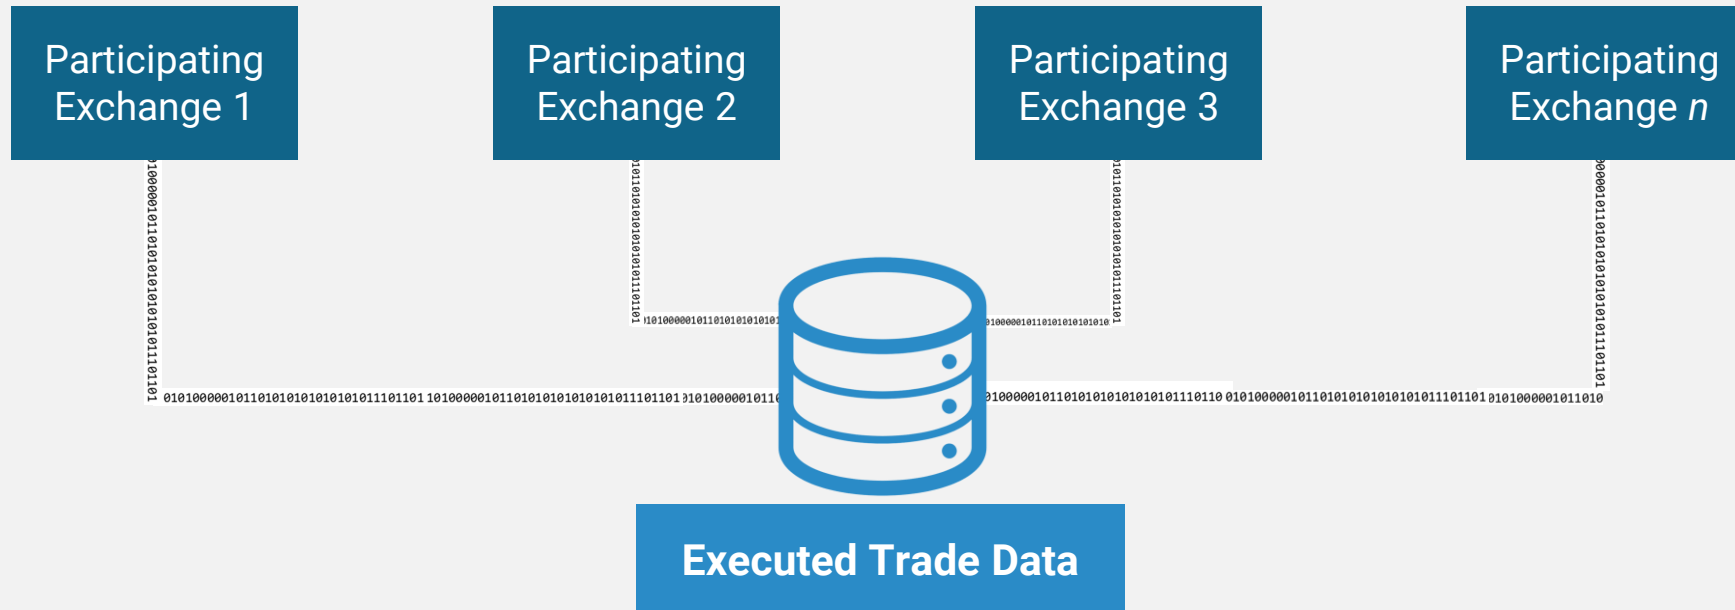

Market Status Classification Criteria

CRITERIA	WATCHLIST	PARTICIPATING
Regulatory Criteria		
Capital Controls: Domicile of Exchange does not restrict capital trading to foreign or international investors	●	●
Exchanges must be managed by companies with easily available and verified biographical information on its leadership team	●	●
Regulatory Compliance: the Exchange operates within the laws of its domiciled country and does not knowingly violate any local or international regulations applicable to it based on its location, or the location of its permitted users and has obtained the relevant licensing and registrations		●
Differentiation of Users Based on Geolocation: restricts trading to users in specific jurisdictions		●
Obtained the relevant licensing and registrations for the jurisdiction(s) in which the Exchange maintains an office, is headquartered, or is otherwise registered to do business		●
Exchange has complied with regulatory authorities for requests for information		●
Governance and Institutional Criteria		
Must maintain a minimum daily reported volume of \$5M USD each day over the previous six months	●	●
"Know Your Customer" (KYC) and Anti-Money Laundering (AML) controls require, at a minimum, that a user verify their name, phone number and bank account prior to using the platform including FTSE and DAR's ability to audit the policies		●
Information Sharing: Provide upon request by FTSE and DAR information around unusual or suspicious market activity		●
Sanctions Lists: an Exchange is reviewed against third-party sanctions lists		●
Fees: An Exchange must have a publicly listed fee schedule which is uniformly practiced and demonstrates that the Exchange operation as a centralized, for-profit business		●

CRITERIA	WATCHLIST	PARTICIPATING
Governance and Institutional Criteria Continued		
Accessible Support Team: Provide open support communication channels to its users		●
Criminal or Regulatory Misconduct: No founded accusations of misconduct or criminal charges against the Exchange and the Exchange has complied with regulatory authorities for requests of information		●
Technical Criteria		
Centralized Spot Exchange, centralized organization that facilitates spot delivery transactions of underlying assets	●	●
Required Data: Trade data is available and allows for continuous delivery of trade prices and trading volume data, including data fields which detail the asset pair, price, volume and accurate timestamp for each trade	●	●
No Meaningful Security Lapses: No meaningful security lapse or breach in the last 12 months which resulted in the loss of client or Exchange funds exceeding 1% of its total holdings		●
No Known Deficiencies in Operational Security: focusing on mitigating potential attack vectors and operational risks.		●
Have no significant downtime, defined as more than 24 cumulative hours in a quarter		●
Data Science Criteria		
Trading needs to follow natural buy and sell patterns	●	●
Trading occurs at natural and expected lot levels	●	●
Price follows natural patterns that track with the market	●	●
Volume follows natural patterns that track with the market	Pass any two of three criteria over previous two quarters	Pass any two of three criteria over previous two quarters
Order book shows active and competitive behavior		

Aggregate prices from vetted sources

DAR aggregates raw trade data for each constituent asset from the Participating Exchanges* in order to derive a consolidated price.

*Please note the same process is in place for the Watchlist Exchange which are pricing sources for the Non-Benchmark Assets.

Trade filtration methodology

First, we filter on the exchange level:

1. For each asset we take the last 15 seconds of trades and create an VWAP at each exchange
2. We then calculate the standard deviation and mean of this dataset
3. Any exchange whose VWAP asset price is more than 1.5 standard deviations away from the mean has all their trades for that asset removed from contribution of the final FTSE DAR 15 second price

Then, we filter on Asset Level:

1. For each asset we gather the most recent 10 minutes worth of trade data and convert all trade prices to USD
2. We then calculate the standard deviation and mean of this dataset
3. Any trades that are 2.5 standard deviations away from the mean are removed from the dataset

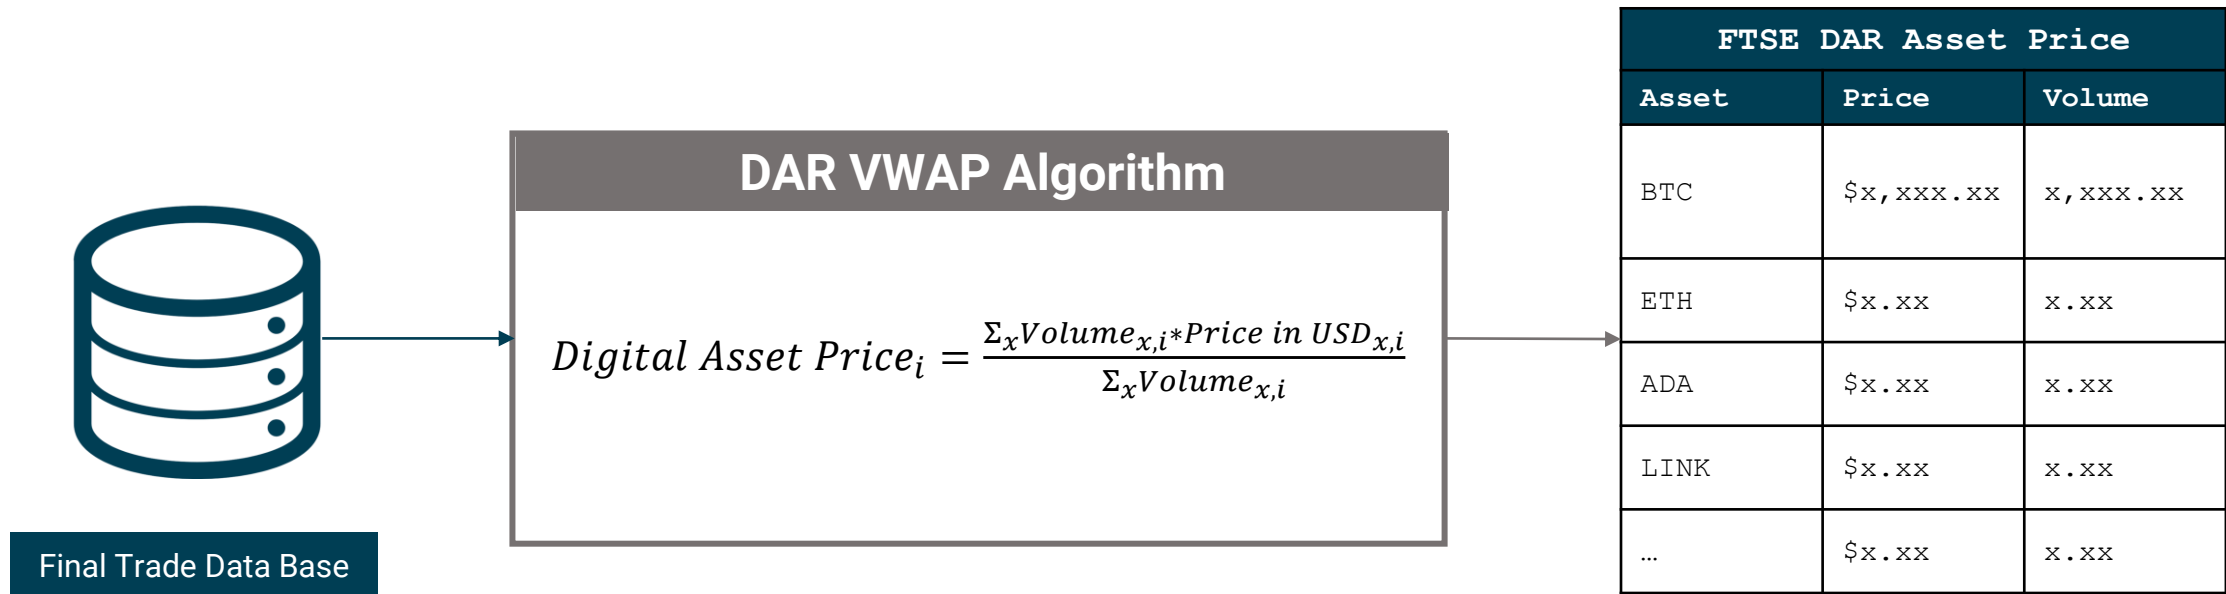

March 2022 Results:

Exchange Status	No. of Filtered Trades	Total Trades	Percent
Participating	18,570,483	323,861,754	5.73%
Watchlist	34,786,593	612,340,375	5.68%

Benchmark Status	No. of Filtered Trades	Total Trades	Percent
Benchmark Assets	16,619,216	259,516,254	6.40%
Non-Benchmark Assets	36,280,006	676,685,875	5.36%

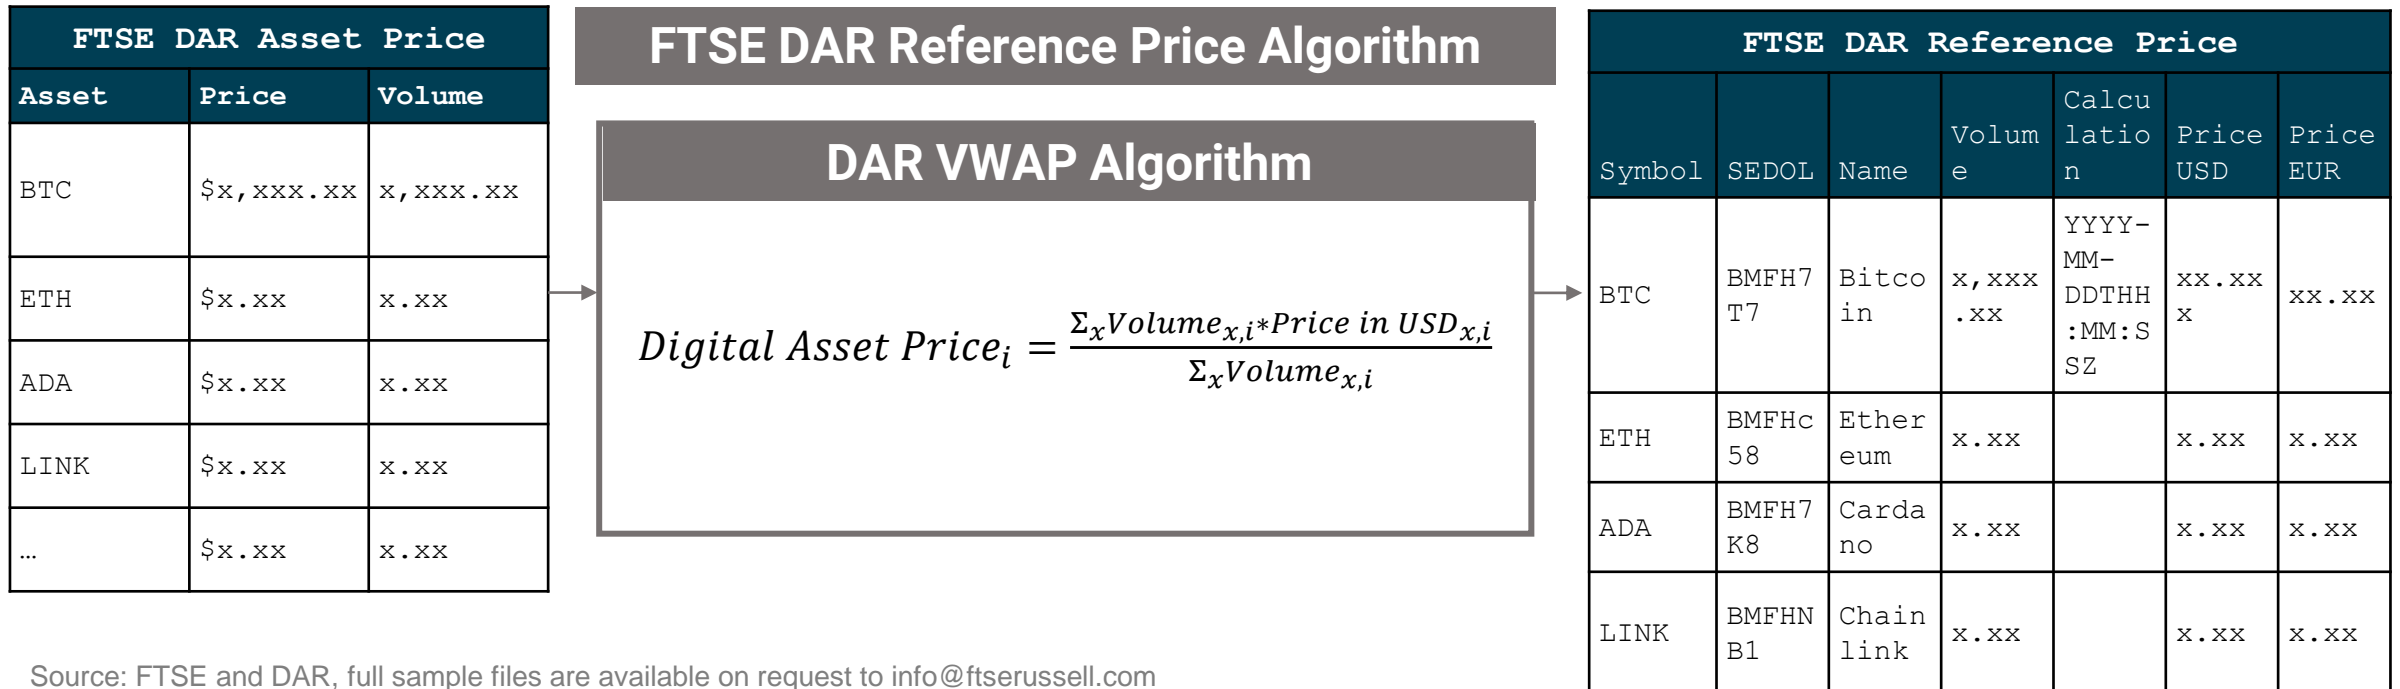

FTSE DAR asset price calculation process

Once the data is cleansed, DAR calculates a Volume Weighted Average Price (VWAP) in USD for all constituent assets every 15 seconds. If no trades have been made in the most recent 15 seconds, the previous price is pulled forward.

FTSE DAR reference price calculation process

DAR delivers to FTSE the FTSE DAR Asset price every 15 seconds. FTSE calculates the volume time weighted average of the FTSE DAR Digital Asset Price over the 15-minute period before the fixing time. The Reference Prices are calculated every hour, 24 times per day. The FTSE DAR Reference Prices are utilized in the indices for official closes.
