| Update | 1 | CE860 | This report contains all Delivery Instructions that are partially pending or fully pending on the current C7 SCS business day including Cash-Only Delivery Instructions resulting from strange nets. Settlements with Actual Settlement Date greater than current C7 SCS business day due to settlement after business day shift at (I)CSD will be considered as pending in C7 SCS and will be reported in Pending Delivery Report. However, the same will be reported as SETTLED on the next C7 SCS business day in Settled Delivery Report. The report shows remaining quantity and remaining amount per Delivery Instruction and provides a reference to the Net Position Trade or Repo Trade belonging to this Delivery Instruction. For Flat (Zero) Net Position Trades no Delivery Instructions are created and these trades are reported on Net Position Trade level until Contractual Settlement Date is reached. The same day settlement Repo Trades (e.g., front-legs from an Overnight repo) are reported at least once in this report on Contractual Settlement date. Report provides multiple references per Delivery ID that can be used by members to unambiguously locate relevant Delivery Instructions in their systems and perform potential modifications at (I)CSDs. These references are:

   a. Delivery Reference: unique identifier generated by C7 SCS and sent to (I)CSDs.
   b. CSD Reference: generated by (I)CSD representing the CASCADE reference at CBF or the unique Transaction ID generated by and used at CCO; not applicable for other (I)CSDs.
   c. Underlying Reference: original Delivery Reference in case Corporate Action events applied on a Delivery Instruction.
   d. Delivery ID: unique identifier generated by C7 SCS for internal referencing.

On the C7 SCS Business Day when the Net Position Trade is generated, the CREST transaction ID is not provided in field CSD Reference in this report for pending deliveries to be settled at CCO because feedback from CCO is only received on next CCO Business Day.

Delivery Instructions are reported per Clearing Member, Settlement Location, Settlement Account, Currency, ISIN, Account Type, Trading Member and Type of Information.

Type of Information is used to distinguish between:

1. NET DELIVERY INFORMATION: Pending Delivery Instructions/ Net Position Trades resulting out of Net or Aggregate processing
2. GROSS DELIVERY INFORMATION: Pending Delivery Instructions/ Net Position Trades resulting out of Gross processing
3. REPO NET DELIVERY INFORMATION: Pending Delivery Instructions/ Surplus Repo Trades resulting out of Net processing
4. REPO GROSS DELIVERY INFORMATION: Pending Delivery Instructions/ Repo Trades resulting out of Gross processing
5. REPO OFFSET BLOCK INFORMATION: Offsetting Repo Trades resulting out of Net processing

Within each block the Delivery Instructions are sorted by Delivery ID and their Contractual Settlement Date starting with the most overdue settlements. In case portions of remaining quantity and remaining amount of trades are not reflected in any active Delivery Instruction at the (I)CSD (e.g., in case of Buy-in processing, Flat (Zero) Net Position Trades, Flat (Zero) Repo Trades, Offsetting Repo Trades) these portions are reported per Trade sorted by Buy Sell indicator and trade number in ascending order and with Delivery ID 'NA'. GC Pooling Repo Trades are instructed as Exposure Adjustments and are referred to as Delivery... |
Instructions. The delivery ID is always reported as 'NA' for GC Pooling Trades in this report as Exposure Adjustments are created on next business day just before instructing to Triparty.

In case the Delivery ID is filled with 'NA', delivery instruction specific fields as remaining and total instructed quantity/amount and Buy Sell indicator are not filled.

The report provides totals for pending amounts per Type of Information, Trading Member, Account Type, ISIN, Settlement Location/ Settlement Account per currency.

In case a trade or delivery instruction was created/adjusted due to a corporate action processed by and received from (I)CSD before creation of the report, the respective corporate action identifier (CSD's CORP ID) is reported.

The report is generated at the end of each business day (EoD). In case no data are to be reported, an empty report is provided (NO DATA Report).

4 Common Chapters

4.1 Update

4.1.1 Introduction section is updated

1 Introduction

Please note that all reports are provided exclusively via the Common Report Engine. For products trades not yet covered by C7 SCS and cleared by Eurex Clearing’s Securities CCP (Securities CCP), Eurex Clearing’s Securities CCP continues to generate and distribute the corresponding reports as done currently. Report Description for those reports continues to be described as part of the Securities CCP documentation being available under the following path:

Separate Reports for Securities CCP and C7 SCS

With the introduction of the new C7 SCS system for equities and bonds business, transaction data and historic data were not migrated to the new platform. Pending trades and delivery instructions in equities and bonds from trading locations XETR, XERA and XEUR continue continued to be processed and completed in Securities CCP system. Consequently, such trades and delivery instructions continue continued to be reported on Securities CCP reports, while new transactions concluded after C7 SCS Release 1.0 are reported on new C7 SCS reports.

With C7 SCS Release 2.0 also Repo transactions were Repo transactions were migrated to the new platform. Pending trades in Repo business from trading locations XERE will be migrated to the new platform. Hence, Repo transactions will be reported on new C7 SCS reports.

With C7 SCS Release 3.0 physical deliveries in UK and Irish securities resulting from Eurex derivatives (XEUR) which settle at Euroclear UK & International (CCO, ‘CREST’) are migrated to the new platform. Transaction data and historic data were not migrated to the new platform. Pending trades and delivery instructions from trading location XEUR continue to be processed and completed in Securities CCP system. Consequently, such trades and delivery instructions continue to be reported on Securities CCP reports, while new transactions concluded after C7 SCS Release 3.0 are reported on new C7 SCS reports.

Reporting of new transactions concluded after Launch of C7 SCS Release 3.0 will be included in existing C7 SCS Reports.
