

Daily Options on EURO STOXX 50[®] and DAX[®]

Built for agility

November 2025

Content

- 1 Background for Daily Options
- 2 Daily Options on the Euro STOXX 50[®] Index
- 3 Daily Options on the DAX[®] Index

1 Background for Daily Options

Background

- Short-dated options have become increasingly popular, offering investors additional opportunities to **trade and hedge short-term market fluctuations**.
- On the **28th August 2023**, Eurex launched Daily Options on the Euro STOXX 50[®] Index (OEXP). The addition of Daily Options to Eurex' product offering should **improve liquidity** generally in the Euro STOXX 50[®] Index ecosystem, thereby also benefitting OESX, VSTOXX and Variance.
- On the **13th November 2023**, Daily Options on the DAX[®] Index (ODAP) followed. DAX[®] is a **leading index** amongst German retail investors and is used by institutional investors as well.
- Eurex' Daily Options have **End-of-Day expiry**, capturing the full European trading day and overlapping with the US market.

Key Benefits of Daily Options

Fast reaction to market movements

Daily options allow market participants to react to sudden market moves and finetune positioning around events such as elections and publication of economic key figures.

Lower time value

The lower time value makes Daily Options more affordable than the longer-dated alternatives.

Accurate implementation of strategy

With daily expiries and a wide range of available strikes, investors can accurately implement specific views and strategies.

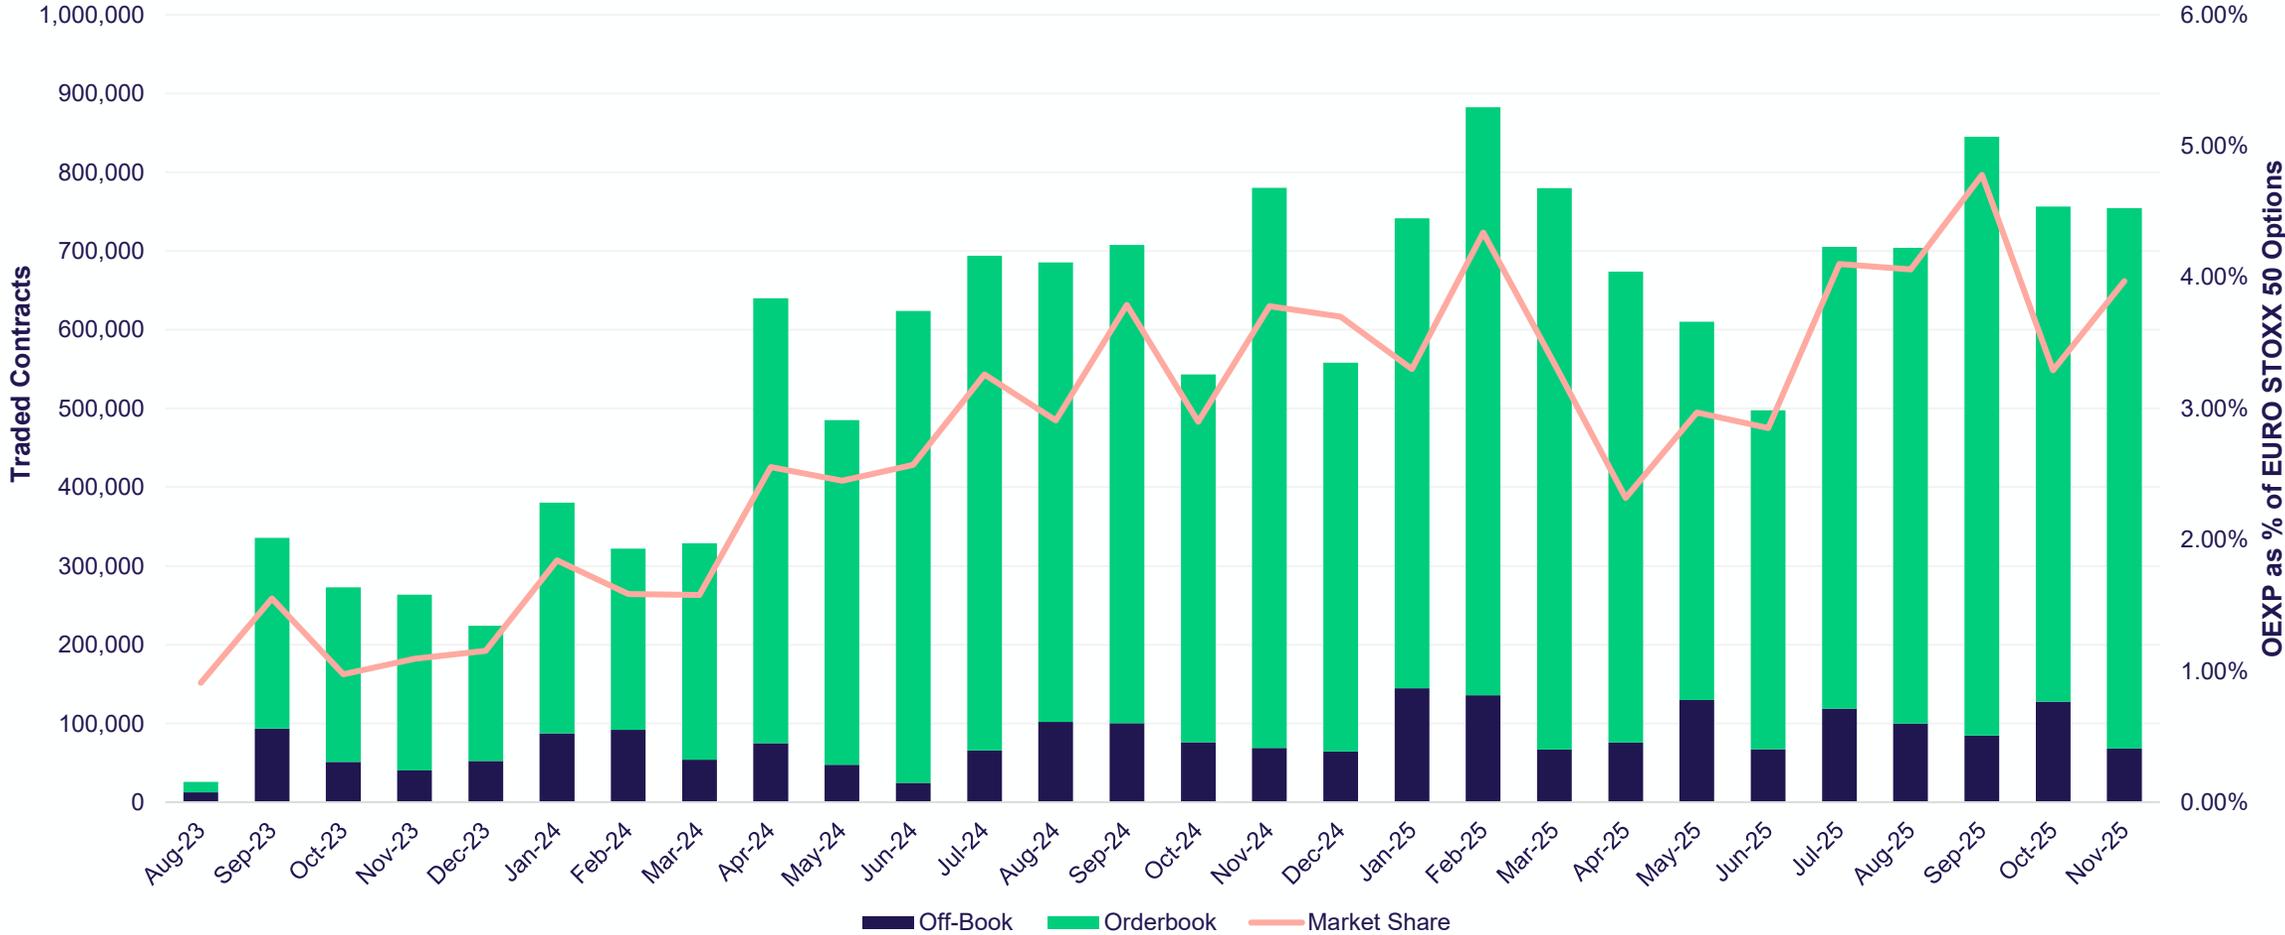

Utilize theta decay

The extreme theta decay of short-dated options can be utilized via various shorting strategies.

Min. block trade size	1,000 contracts (no non-disclosure limits and no flex options available)
Trading hours	09.00 – 17.30 CET (TES: 09.00 – 19.00 CET)

Bloomberg tickers

Bloomberg SX5E Root Ticker:

SX5 + EOD + A + Index = SX5EODA Index

The ticker setup follows the logic of previously existing SX5E Friday weekly expiries at Eurex and uses A-Y and Week numbering to differentiate the daily expiries.

Please note, the contract generation cycle is following this logic: For a given day at t, generate t+0, t+1, t+2, t+3, t+4 daily expiries and the closest 3 End of Month expiries. **If End of Month expiry already generated (as it will be the case on the date of launch for August 31 End of Month expiry), the creation of daily expiry is suppressed.**

Overview via OMON:

SX5E Index OMON - All daily, weekly and monthly options (OESX and OEXP)

SX5EM Index OMON - End of month (OESX) (existing contracts midday settlement time)

SX5EOM Index OMON - End of month (OEXP) (new contracts with settlement time end of day)

Introduction of the DAX[®] Index EoD options

The DAX[®] index is the **leading index** used by German **retail investors** based on CFD statistics and feedback by structured issuers.

DAX[®] weekly options are the **second most traded weekly options** at Eurex. Market share of DAX[®] weekly options compared to the monthly DAX[®] options is higher than in Euro STOXX 50[®] (approx. 12%).

The DAX[®] Index EoD Options (ODAP) are set up analogous to the Euro STOXX 50[®] Index EoD Options (OEXP), which were successfully launched on 28 August 2023.

DAX[®] Index EoD Options differ from the existing DAX[®] Index Options (ODAX) in terms of **final settlement price** determination, supported **expiration days** and maximum offered terms. On expiration day, the end of trading is at 17:30 CET compared to 13:00 CET in ODAX. The final settlement price for ODAP is determined by the index close value.

Contract specifications

Key Specifications - ODAP

	Description
Eurex Product ID	ODAP
Underlying/ISIN	DAX® Index / ISIN: DE0008469008
Contract size/value	EUR 5
