Futures contracts on dividends of stocks	

The company Admiral Group plc has announced the payment of a special dividend of GBp 19.70 per share in addition to a regular cash dividend of GBp 51,30 share.

More information about this transaction is available on the company`s website.

The payment of the special dividend will result in an adjustment of the above-mentioned contracts.

Procedure

R-Factor Method

Determination of adjustment factor (R-factor)

S1	Closing auction price of the share
S2	S1 minus ordinary dividend
S3	S2 minus special dividend
R-Factor	$S3/S2$

Futures

1. Adjustment of contract size and variation margin

- To adjust the calculation of the variation margin of the following exchange trading day, settlement prices of the last cum-trading day will be multiplied by the R-Factor.
- The new contract size will be calculated as follows:
Contract size new = contract size old / R-factor
- All outstanding orders and quotes will be deleted after close of trading on the last cum-trading day.
- The adjustment also refers to existing positions in TES flexible futures.

Introduction of a new contract

- A new single stock futures contract with standard contract size 1000 will be introduced.
- The exact introduction date will be published via a circular.
- As soon as there are no more contract months with open interest in the adjusted contract, trading in this contract will be put on "HALT" and finally discontinued.
- Furthermore, no new contract months will be introduced in the adjusted contracts.

If there is no open interest on the last cum-trading day after close of trading in one of the original contracts, no adjustment will be made for these contracts and no successor contract will be introduced.
