Corporate Action	Bonus Share Issue
Company	Konecranes OYJ
ISIN	FI0009005870
Rules & Regulations	Contract Specifications for Futures Contracts and Options Contracts at Eurex Deutschland, section(s) 1.6.7 (5) ,1.13.8 (5), 1.26.11 (4), 1.27.8 (5), 2.6.10.1 (6)
Options contracts on stocks	KCR
Futures contracts on stocks	KCRF

The company Konecranes Oyj has announced a 2-for-1 bonus share issue.

More information about this bonus share issue is available on the company's website

This corporate action will result in an adjustment of the above-mentioned contracts.

Procedure

R-Factor Method

Number of old shares	1
Number of new shares	3
R-factor	0.33333333

Options

1. Adjustment of strike prices and contract sizes

- All existing strike prices will be multiplied by the R-factor. Strike prices will be rounded using mathematical rounding conventions to the number of decimal places according to their listing standard.
- The contracts size will be divided by the R-factor. In case the adjustment of the trading unit results in a lot size that is not an increment of one share, the adjusted lot size will be rounded to the nearest whole share. An equalization payment will be made to neutralize the effect of rounding.
- The version number of the existing series will be increased by one.
- Immediately after close of trading on the last cum -trading day, adjusted strike prices and contract sizes will be published on www.eurex.com in section

Rules & Regs > Corporate actions > Corporate action information

- New series with standard contract size 100 and version number 0 will be introduced effective the ex-date.
- All existing orders and quotes will be deleted after close of trading on the last cum -trading day.
- The adjustment also refers to existing positions in TES flexible options. The existing flex strikes will be rounded using mathematical rounding conventions, to four decimal places.

Futures

1. Adjustment of contract size and variation margin

- To adjust the calculation of the variation margin of the following exchange trading day, settlement prices of the last cum trading day will be multiplied by the R-Factor.
- The new contract size will be calculated as follows: $\text{Contract size new} = \text{contract size old} / \text{R-factor}$
- All outstanding orders and quotes will be deleted after close of trading on the last cum trading day.
- The adjustment also refers to existing positions in TES flexible futures.

2. Introduction of a new contract

- A new single stock futures contract with standard contract size 100 will be introduced.
- The exact introduction date will be published via a circular.
- As soon as the new contract is available for trading and there are no more contract months with open interest in the original contract, trading in the existing contract will be discontinued.
- Furthermore, no new contract months will be introduced in the original contract

Should there be no open interest on the last cum trading day after close of trading in one of the original contracts, these contracts will not be adjusted and no successor contract will be introduced.
